٥.		3
	SYLLABUS	
6.	Syllabus of Third Semester BE:	
	a) Applied Mathematics –III	7
	b) Life Skills for Engineers	10
	c) Environmental Science and Awareness	12
	d) Digital Electronic Circuits	15
	e) Analog Electronic Circuits	18
	f) Network Analysis	21
	g) Signals and Systems	24
	h) Digital Electronic Circuits Lab	27
	i) Analog Electronic Circuits Lab	30
	j)Mini project-I	33
7.	Syllabus of Fourth Semester BE:	
	a) Applied Mathematics-IV	35
	b) Economics for Engineers	38
	c) Adalitha Kannada	41
	d) Vyavaharika Kannada	42
	e) System Design using HDL	43
	f) Digital Signal Processing	46
	g) Control Systems	49
	h) Linear Integrated Circuits	52
	i) Hardware Description Language Lab	56
	j) Digital Signal Processing Lab	59
	k) Mini Project-2	62
8.	Syllabus for Common Subjects	
	a) Basic Applied Mathematics-I	63
	b) Basic Applied Mathematics-II	65
	c) Essential English	67
	d) Constitution of India and Professional Ethics	69
9.	Appendix	
	a)Appendix A Outcome Based Education	71
	b)Appendix B Graduate Parameters as defined by National Board of Accreditation	72
	c) Appendix C Bloom's Taxonomy	74

#### **VISION**

To create high quality engineering professionals who can serve the society and earn global recognition.

#### **MISSION**

- To build strong foundation in Electronics and Communication Engineering aspects by exposing students to state of the art technology and research.
- To strengthen the curriculum through interaction with industry experts to equip the students with the required competency.
- To mould students to share technical knowledge and to practice professional and moral values.

#### **Program Education objectives (PEOs)**

PEO1	To produce graduates with understanding of fundamentals and applications of Electronics and Communication Engineering.
PEO2	To hone graduates with ability to apply, analyze, design and develop electronic systems.
PEO3	To enhance graduates with latest technologies to enable them to engineer products for real world problems.
PEO4	To build leadership qualities, management skills, communication skills, moral values, team spirit and lifelong learning ability for the graduates.

#### **PEO to Mission Statement Mapping**

Mission Statements	PEO1	PEO2	PEO3	PEO4
To build strong foundation in Electronics and				
Communication Engineering aspects by exposing students	3	3	3	2
to state of the art technology and research.				
To strengthen the curriculum through interaction with				
industry experts to equip the students with the required	2	3	3	2
competency.				
To mould students to share technical knowledge and to	1	2	2	2
practice professional and moral values.	1	2	2	3

Correlation: 3- High, 2-Medium, 1-Low

# **Program Outcomes (PO) with Graduate Attributes**

	Graduate Attributes	Program Outcomes (POs)					
1	Engineering knowledge	<b>PO1:</b> Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems in Electronics and Communication Engineering.					
2	Problem analysis	<b>PO2:</b> Identify, formulate, review research literature, and analyze complex engineering problems in Electronics and Communication Engineering reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.					
3	Design/development of solutions	<b>PO3:</b> Design solutions for complex engineering problems and design system components or processes of Electronics and Communication Engineering that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.					
4	Conduct investigations of complex problems	<b>PO4:</b> Use research-based knowledge and research methods including design of experiments in Electronics and Communication Engineering, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.					
5	Modern tool usage	<b>PO5:</b> Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities in Electronics and Communication Engineering with an understanding of the limitations.					
6	The engineer and society	<b>PO6:</b> Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice in Electronics and Communication Engineering.					
7	Environment and sustainability	<b>PO7:</b> Understand the impact of the professional engineering solutions of Electronics and Communication Engineering in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.					
8	Ethics	<b>PO8:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.					
9	Individual and team work	<b>PO9:</b> Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.					
10	Communication	<b>PO10:</b> Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.					

11	Project management and finance	<b>PO11:</b> Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12	Life-long learning	<b>PO12:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

# **Program Specific Outcomes**

PSO1	To demonstrate the ability to design and develop complex systems in the areas of next generation Communication Systems, IoT based Embedded Systems, Advanced Signal and Image Processing, latest Semiconductor technologies, RF and Power Systems.
PSO2	To demonstrate the ability to solve complex Electronics and Communication Engineering problems using latest hardware and software tools along with analytical skills to contribute to useful, frugal and eco-friendly solutions.

# Mapping of PEOs to POs & PSOs

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

# THIRD SEMESTER (SYLLABUS)

APPLIED MATHEMATICS – III									
Course Code: 20ECE31A	Credits: 3								
L: T: P: S: 2:1:0:0	CIE Marks: 50								
Exam Hours: 03	SEE Marks: 50								

#### Course Outcomes: At the end of the Course, the Student will be able to do the following:

CO1	Use appropriate numerical methods to solve algebraic equations and transcendental
	equations
CO2	Evaluate a definite integral numerically and use appropriate numerical methods to solve
	Boundary Value Problems in Partial differential equations
CO3	Fit a suitable curve by the method of least squares and determine the lines of regression
	for a set of statistical data and obtain the extremal of a functional
CO4	Express the periodic functions as Fourier series expansion analytically and numerically
CO5	Solve the continuous model problems using Fourier transforms
CO6	Applying Z-transforms method, solve the discrete model problems

# **Mapping of Course Outcomes to Program Outcomes:**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	3	3	3	3	-	3	-	-	-	3	3
CO2	3	3	3	3	3	-	3	-	-	-	3	3
CO3	3	3	3	3	3	1	3	-	-	1	3	3
CO4	3	3	3	3	3	-	-	-	-	-	3	3
CO5	3	3	3	3	3	-	-	-	-	-	3	3
CO6	3	3	3	3	3	-	-	-	-	-	3	3

	Course Syllabus								
Module	Contents of the Module	Hours	Co's						
No.									
1.	<b>Numerical Methods-1:</b> Numerical solution of algebraic and transcendental equations: Regula-falsi method and Newton-Raphson Method-Problems. Interpolation: Newton's forward and backward formulae for equal intervals, Newton divided difference and Lagrange's formulae for unequal intervals (without proofs)-Problems.	9	CO1						

2.	Numerical Methods-2: Numerical integration: Simpson's 1/3 <sup>rd</sup> rule, Simpson's 3/8 <sup>th</sup> rule, Weddle's rule (without proofs)-Problems. Numerical solution of one-dimensional wave equation, heat equation and two-dimensional Laplace's equation.  Applications: Application of numerical integration to velocity of a particle and volume of solids.	9	CO2
3.	<b>Statistical Methods and Calculus of Variation:</b> Fitting of the curves of the form $y = a + bx$ , $y = a + bx + cx^2$ , $y = ae^{bx}$ , $y = ax^b$ , and $y = ab^x$ by the method of least square-Problems. Correlation and Regression Lines-Problems. Variation of a function and a functional, variational problems, Euler's equation and Isoperimetric problems. <b>Applications:</b> Brachistochrone problem, Minimal surface of revolution and Hanging cable.	9	CO3
4.	<b>Fourier series:</b> Periodic function, Dirichlet's conditions, Fourier series of periodic functions of period $2\pi$ and arbitrary period $2l$ , half range series-Problems. <b>Applications:</b> Fourier series and half Range Fourier series of periodic square wave, half wave rectifier, full wave rectifier, Saw-tooth wave with graphical representation, practical harmonic analysis-Problems.	9	CO4
5.	Fourier Transforms: Infinite Fourier transforms, Fourier Sine and Cosine transforms, Inverse Fourier sine and cosine transforms.  Z - Transform: Definition, Z-transforms of some standard functions, properties, damping rule, shifting rule (without proof), initial and final value theorems, inverse Z- transforms by partial fractions method.  Applications: Solving difference equations using Z-transform.	9	CO5, CO6

LIFE SKILLS FOR ENGINEERS						
Course Code: 20HSS322A	Credits: 3					
L: T: P: S: 3:0:0:0	CIE Marks: 50					
Exam Hours: 03	SEE Marks: 50					

# Course Outcomes: At the end of the course, the student will be able to:

CO1	Relate "SMART GOALS" to personal and professional life
CO2	Articulate and communicate ideas and thoughts with clarity and focus
CO3	Develop critical and creative thinking skills for problem solving and decision making for leadership.
CO4	Analyze the importance of the concepts of personality development and grooming in corporate life
CO5	Determine personal and professional responsibility by using ownership task bar

#### **Mapping of Course Outcomes to Program Outcomes:**

20HSS322A	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1								3	3	3	3	3
CO2						3	3	3	3	1	3	3
CO3						3	3	3	3	3	2	3
CO4							3	3	3	3	2	3
CO5						3	2	3	3	2	3	3

Module No.	Module Contents	Hours
1	Goal Setting: Importance of Goals: Achiever's goal - Creating SMART for personal and professional life, Right action at right time, career planning, overcoming fear and face uncertainty, Mind Mapping. Communication – Intellectual preparation/Idea generation.	6
2	You are the creator - Taking Ownership, Being Responsible and Accountable. Meaning of Ownership, Responsibility and Accountability, Practicing these philosophies in course, career. Social responsibility. Communication – Organising thought flow.	6
3	Self-Awareness and Self-Management: Emotional Intelligence, Know yourself- understanding personality, perception, techniques to understand self – Johari window and SWOT, reason for fall and opportunities to grow. Individual behaviour, attitude towards change and work in industry, being proactive and positive. Interpersonal skills - Knowing others, working well with others. Communication – Structured articulation	9

4	Leadership, meaning, self- motivation, coming out of comfort zone, mental preparation - accepting failure and resilience, decision making, thinking skills – critical and creative, six thinking hats, watchfulness - proactive risk management, problem solving mind set .Communication – Tips for Jam session, GD and Presentation	9
5	Personality Development and Grooming: - Expectations from the industry, building personal presence, corporate grooming, corporate etiquettes, Personal branding and image management. Communication – Mock GD sessions	6

#### **REFERENCE BOOKS:**

- 1. The 7 Habits of Highly Effective People, Stephen R Covey, Neha Publishers.
- 2. Seven Habits of Highly Effective Teens, Convey Sean, New York, Fireside Publishers, 1998.
- 3. Emotional Intelligence, Daniel Coleman, Bantam Book, 2006.
- 4. How to win friends and influence people Dale Carnegie
- 5. BHAGAVDGITA for college students Sandeepa Guntreddy

#### **CIE- Continuous Internal Evaluation (50 Marks)**

Bloom's Category	Tests	Assignments	Self-Study	Peer Evaluation
Marks (out of 50)	10	15	15	10
Remember	-	-	-	-
Understand	-	-	-	-
Apply	5	5	-	5
Analyze	-	-	5	-
Evaluate	-	-	-	
Create	5	10	10	5

#### **SEE- Semester End Examination (50 Marks)**

NOTE: Being a Life skills course we felt it would be suitable to do the final assessment through a structured group discussion which will provide an opportunity to test students in all levels of Bloom's Taxonomy.

Bloom's Category	<b>Group Discussion</b>
Remember	5
Understand	10
Apply	10
Analyse	10
Evaluate	5
Create	10

ENVIRONMENTAL SCIENCE AND AWARENESS							
Course Code: 20HSS323A	Credits: 0						
L:T: P :S : 0:0:0:0	CIE Marks: 25						
Exam Hours: 2	SEE Marks: 25						

# Course Outcomes: At the end of the Course, the student will be able to:

CO1	Explain the concepts of environment, ecosystem and biodiversity
CO2	Differentiate the use of natural resources for sustainability
CO3	Analyze the control measures of Environmental pollution, the role of Government and NGO in solving Socio-Environmental issues
CO4	Apply the Environmental ethics, acts and amendments in protecting Environment and human health

#### **Mapping of Course Outcomes to Program Outcomes:**

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	-	-	-	1	-	3	3	-	-	-	-	-	1	-
CO2	-	-	-	1	-	3	3	-	-	-	-	3	3	-
CO3	-	-	-	-	-	3	3	3	-	3	-	3	3	-
CO4	-	-	-	-	-	3	3	3	-	3	-	3	3	_

Module No.	Content of Module	Hrs	Cos
1	Introduction to Environment, Ecosystem and biodiversity: Environment - Components of Environment, Scope and importance of Environmental studies, Ecosystem: Types & Structure of Ecosystem, Energy flow in the ecosystem, Food chains – food webs & ecological pyramids. Biodiversity – Definition, Hot-spots of biodiversity, Threats to biodiversity, Conservation of biodiversity.	05	CO1

2	Natural Resources: Renewable and non-renewable resources – Natural resources and associated problems. Role of an individual in conservation of natural resources. Water conservation, rain water harvesting. Balanced use of resources for sustainable lifestyle – strategies.	04	CO2
3	<b>Environmental Pollution:</b> Definition, Causes, effects and control measures of Air Pollution, Water Pollution, Soil Pollution, Marine Pollution, Noise pollution, Thermal Pollution and Nuclear hazards. Role of an individual in prevention of pollution - Waste management – urban and industrial wastes.	04	CO3
4	<b>Social Issues and Environment:</b> Environmental ethics – issues and possible solutions. Environment protection act – Air (prevention and Control of pollution) act & Water (prevention and Control of pollution) act. Role of government: Swatch Bharat Abhiyan, National Mission for Clean Ganga (NMCG), River rejuvenation, Role of Non-governmental Organizations (NGOs), Global warming and climate change.	04	CO3 & CO4
5	<b>Human Population and Environment:</b> Population growth & explosion, Family welfare programme. Environment and human health, Human rights, Value education. Role of Technology in protecting environment and human health.	05	CO4

Correlation levels: 1-Slight(Low) 2-Moderate(Medium) 3-Substantial(High)

Module No	<b>Module Contents</b>	Hours	COs
1	Principles of Combinational Logic: Binary Logic functions, pass gates &Logic Gates using nMOS, pMOS and CMOS, DE Morgan's Theorem, Definition of combinational logic, Canonical forms, Generation of switching equations from truth table, Karnaugh maps (3, 4 and 5 variables), Incompletely specified functions(Don't care terms), Map entered Variables (3,4 variables). Realizing functions using MOS Logic. (Text 1, Chapter 3)	09	CO1, CO2
2	Analysis and design of combinational logic: General Approach to combinational logic, Decoders, Encoders, Priority Encoders, Digital Multiplexers, Adders and Subtractor, Cascading full adders, Look Ahead carry adder, Binary Comparators, Code Conversion, MUX using Pass Gates and Inverters, realization of different logics using 2X1 Multiplexer. (Text 1, Chapter 4)	09	CO3
3	Sequential Circuits: Sequential circuit models, Basic Bistable Element, Latches-SR Latch, Application of SR Latch - A Switch Debouncer, S'R' Latch, The gated SR Latch, The gated D Latch, Timing Considerations, FlipFlops- JK Clocked FlipFlops, Clocked T Flipflop, Clocked D Flipflop, The Master-Slave Flip-Flops, Edge Triggered Flip-Flop, Characteristic equations, D Flip Flop using CMOS Pass gates and inverters, Conversion of Flip-Flops.  (Text 2, Chapter 6)	09	CO4
4	Simple flip-flop Applications: Shift Registers: PIPO, SIPO, PISO, SISO, Universal Shift register. Counter: Ripple Counters, synchronous binary counter, Counters based on Shift Registers, Design of synchronous counters- using clocked JK Flip-Flops, clocked D, T, or SR Flip-Flops, Ring counter, Johnson counter.  (Text 2, Chapter 6)	09	CO5
5	Sequential circuit Design: Moore and Mealy State models, state machine notations, Synchronous Sequential Circuit Analysis, Construction of state diagrams, Sequence detector, counter design, Design of ALU.  (Text 1, Chapter 6)	09	CO6

#### **TEXT BOOKS:**

ANALOG ELECTRONIC CIRCUITS				
Course Code: 19ECE34	Credits: 3			
L: T: P: S : 3:0:0:0	CIE Marks: 50			
Exam Hours: 3	SEE Marks:50			

#### Course Outcomes: At the end of the Course, the Student will be able to:

CO1	Compare the BJT and JFET configurations and their respective biasing methods, to perform the load line analysis
CO2	Examine the AC model of BJT as well as JFET to perform the small signal analysis, to obtain the gain and impedance of amplifier circuits
CO3	Distinguish between the equivalent circuits of BJT as well as JFET configurations, to obtain the frequency response of amplifier circuits
CO4	Differentiate between the different feedback topologies that are applied to the general amplifier block
CO5	Employ the positive feedback topology to BJT as well as JFET amplifiers, to obtain the various oscillator circuits
CO6	Demonstrate the working principles of various types of power amplifiers, using the BJT circuits

	Course Syllabus						
Module	Contents of the Module	Hours	CO's				
No.							
1.	<b>Numerical Methods:</b> Numerical solution of ordinary differential equations of first order and of first degree: Modified Euler's method and Runge-Kutta method of fourth-order-Problems. Milne's predictor and corrector methods-Problems.  Numerical Solutions of second order ordinary differential equations by Runge-Kutta method of fourth-order-Problems.	9	CO1				

2.	Complex Variables: Functions of complex variables, Analytical functions, Cauchy-Riemann Equations in Cartesian and Polar forms, Harmonic functions and Construction of analytic functions-Problems using Milne-Thompson's method.  Applications: Flow Problems-Velocity potential, Stream functions and complex potential functions.	9	CO2
3.	Conformal Transformations and Complex Integrations: $w = z^2$ , $w = e^Z$ and $w = z + (1/z)$ . Cauchy's Theorem (with proof), Generalized Cauchy's integral formula, Singularities, Poles and Residues, Residue theorem (without proof)-Problems.	9	CO3
4.	Probability distributions: Random variables (discrete and continuous), probability density functions. Discrete Probability distributions: Binomial and Poisson Distributions-Problems. Continuous Probability distributions: Exponential and Normal Distributions-Problems.  Joint Probability distributions: Mathematical expectation, correlation, covariance (discrete random variables only)-Problems.	9	CO4
5.	Sampling Theory: Sampling, Sampling distributions, test of hypothesis of large samples for means and proportions, Central limit theorem (without proof), Confidence limits for means, Student's t-distribution, F-distribution and Chi-square distribution for test of goodness of fit for small samples.	9	CO5, CO6

ECONOMICS	FOR ENGINEERS
Course Code: 20HSS421A	Credits: 2
L: T: P:S : 2:0:0:0	CIE Marks: 25
Exam Hours: 02	SEE Marks: 25

# Course Outcomes: On completion of the course, the student will be able to:

CO1	Summarize the knowledge of economics and its importance in business decision making
CO2	Make use of economic concepts in business
CO3	Examine the impact of market forces on business
CO4	Interpret the role of market structure in the economic development of a country
CO5	Evaluate the role of budgeting in business decisions

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

1	OPERATIONAL AMPLIFIER FUNDAMENTALS: Basic OpAmp circuit, Op-Amp parameters – Input and output voltage, CMRR and PSRR, offset voltages and currents, Input and output impedances, Slew rate, Frequency limitations.  Op-Amps as DC Amplifiers-Direct coupled – Voltage Followers, Non-inverting Amplifiers, Inverting amplifiers, Summing amplifiers, Difference amplifier.	09	CO1,CO2
2	OP-AMP AS AC AMPLIFIERS- Capacitor coupled Voltage Follower, Capacitor coupled Non-inverting Amplifiers, and Capacitor coupled Inverting amplifiers.  High input impedance - Capacitor coupled Voltage Follower, setting the upper cut-off frequency, Use of a single polarity power supply	09	CO2,CO3, CO4
3	<b>OP-AMP APPLICATIONS:</b> Voltage sources, current sources, Integrator and differentiator, Log and antilog amplifiers, Analog Multiplier and Divider, Instrumentation amplifier, Precision rectifiers, Limiting Circuits, Sample and hold circuits, Zero crossing detectors, Inverting Schmitt trigger circuits.	09	CO3,CO4
4	FILTERS AND IC REGULATORS: RC low-pass and high pass circuit, Active Filters – First and second order Low pass & High pass filters, Band pass and Band Elimination filters, Voltage regulators using IC 78XX and 79XX, 723 general purpose regulator, Switching regulator	09	CO5,CO4
5	OTHER IC APPLICATIONS: 555 Timer and its different circuit applications as Astable & Monostable multivibrator,  PHASE LOCKED LOOP -operating principles, Phase detector / comparator, LM566 VCO  DAC and ADC converters - DAC using R2R, ADC using SAR and counter type.	09	CO6

HARDWARE DESCRI	PTION LANGUAGE LAB
Course Code: 19ECL47	Credits: 1.5
L: T: P:S : 0:0:1.5:0	CIE Marks: 25
Exam Hours: 3	SEE Marks: 25

# Course outcomes: On the completion of this laboratory course, students will be able to:

CO1	Write the Verilog /VHDL programs to simulate Combinational circuits in Dataflow, Behavioral and Gate level Abstractions
CO2	Describe sequential circuits like flip flops and counters in Behavioral description and obtain simulation waveforms
CO3	Design and verify the functionality of digital circuit/system by writing test benches
CO4	Program FPGAs to synthesize the digital designs

**Mapping of Course Outcomes to Program Outcomes:** 

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

Correlation levels: 1-Slight(Low) 2-Moderate(Medium) 3-Substantial(High)

Sl.No	Laboratory Experiments	COs
1	Write an HDL code to realize all logic gates.  (Text1 – chapter 1, Text2- chapter2)	CO1,CO3
2	Write an HDL code to describe the functions of a Full Adder using three modeling styles.  (Text1 – chapter 1, Text2- chapter2)	CO1,CO3
3	Write a model for 16 bit ALU using the 4bit opcodes; the requisite functions can be defined for the chosen opcodes.  (Text1 – chapter 1, Text2- chapter2)	CO1,CO3
4	Write an HDL program for the following designs:  a. Decoder  b. Encoder (without priority and with priority  c. Multiplexer and De multiplexer  (Text1 – chapter 1, Text2- chapter2)	CO1,CO3
5	Write an HDL program for the following designs:  a. 4 bit Binary to Gray converter  b. 4-bit Binary Comparator  (Text1 – chapter 1, Text2- chapter 2)	CO1,CO3
6	Develop the HDL code for the following flipflops: T, D, SR, JK.  (Text1 – chapter 1, Text2- chapter 2)	CO2,CO3
7	Design 4bit Binary and BCD counters (Synchronous reset and Asynchronous reset and "any sequence" counters).  (Text1 – chapter 1, Text2- chapter 2)	CO2,CO3
8	Synthesize the code of above experiments and generate gate level netlist. ( <b>Text2- chapter 2</b> )	CO4
9	Synthesize the code of above experiments and generate gate level netlist. ( <b>Text2- chapter 2</b> )	CO3,CO4
10	Write an HDL code to display messages on the given seven segment display (Text2- chapter 2,3,6)	CO3,CO4,
11	Write the HDL code to control speed, direction of dc and stepper motor( <b>Text2- chapter 2,3,6</b> )	CO3,CO4
12	Write the HDL code to generate different waveforms (sawtooth, sine wave, square, triangle, ramp etc) using DAC and FPGA kit (Text2- chapter 2,3,6)	CO4,

DIGITAL SIGNAL PROCESSING LAB						
Credits: 1.5						
CIE Marks: 25						
SEE Marks: 25						

# Course outcomes: On the completion of this laboratory course, students will be able to:

CO1	Represent and Visualize the signals in Time domain and Frequency domain, and compute the output of the LTI system using Convolution
CO2	Design and realize FIR and IIR filters for the desired frequency response and compare signals using the concept of Correlation
CO3	Implement discrete computations using DSP processor
CO4	Realize digital filters using a simulation tool and analyze the response of the filter for an audio signal

Assessment rubrics that is going to be adopted for direct attainment is depicted in below table

Level of	Elaboration on Course Grading Description	Bench Mark Set
Achievement		(Out of 25)
Excellent (A)	The Student's performance is outstanding in almost all the intended course learning outcomes	21 to 25
Good (B)	The student's performance is good in most of the intended course learning outcomes.	16 to 20
Marginal (C)	The student's performance is barely satisfactory. It marginally meets the intended course learning outcomes	10 to 15
Fail (F)	The Students performance is inadequate. Student fails to meet many of the intended course learning outcomes	Less than 09

#### APPENDIX A

#### **Outcome Based Education**

**Outcome-based education** (OBE) is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience each student should have achieved the goal. There is no specified style of teaching or assessment in OBE; instead classes, opportunities, and assessments should all help students achieve the specified outcomes.

There are three educational Outcomes as defined by the National Board of Accreditation:

**Program Educational Objectives:** The Educational objectives of an engineering degree program are the statements that describe the expected achievements of graduate in their career and also in particular what the graduates are expected to perform and achieve during the first few years after graduation. [nbaindia.org]

**Program Outcomes:** What the student would demonstrate upon graduation. Graduate attributes are separately listed in Appendix C

**Course Outcome:** The specific outcome/s of each course/subject that is a part of the program curriculum. Each subject/course is expected to have a set of Course Outcomes

### **Mapping of Outcomes**

#### APPENDIX B

#### The Graduate Attributes of NBA

**Engineering knowledge**: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**Problem analysis**: Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

Conduct investigations of complex problems: The problems that cannot be solved by straightforward application of knowledge, theories and techniques applicable to the engineering discipline that may not have a unique solution. For example, a design problem can be solved in many ways and lead to multiple possible solutions that require consideration of appropriate constraints/requirements not explicitly given in the problem statement (like: cost, power requirement, durability, product life, etc.) which need to be defined (modeled) within appropriate mathematical framework that often require use of modern computational concepts and tools.

**Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

**The engineer and society**: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal, and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**Individual and team work**: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Communication**: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**Project management and finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**Life-long learning**: Recognise the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

#### APPENDIX C

#### **BLOOM'S TAXONOMY**

**Bloom's taxonomy** is a classification system used to define and distinguish different levels of human cognition—i.e., thinking, learning, and understanding. Educators have typically used Bloom's taxonomy to inform or guide the development of assessments (tests and other evaluations of student learning), curriculum (units, lessons, projects, and other learning activities), and instructional methods such as questioning strategies.
