Objective (100 words)	Demo Day sought to provide innovators—students—a dynamic stage on which to showcase their ground-breaking ideas and prototypes by means of interactive demonstrations and poster presentations. This event created close relationships between seasoned Innovation Ambassadors/Experts and young innovators. The exhibition gave participants chances to get expert advice and helpful feedback.		

Benefit in-terms of learning/skill/knowledge obtained

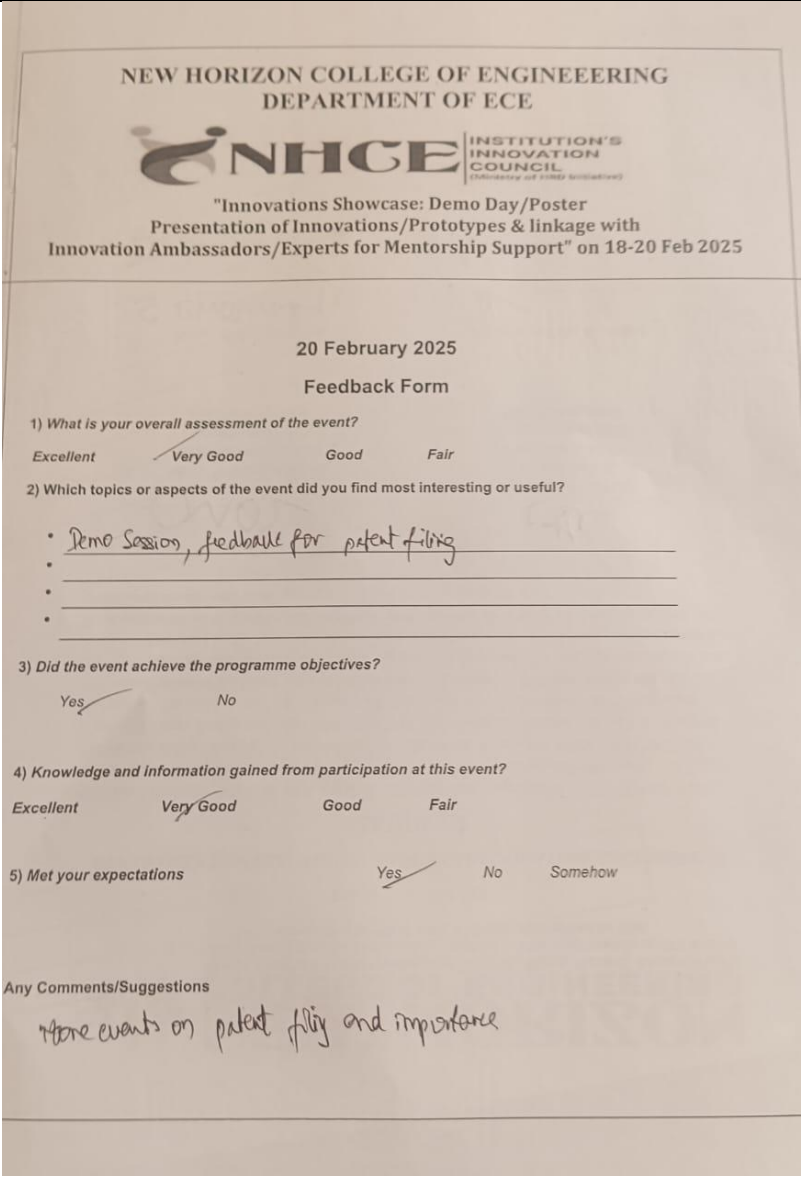

By introducing difficult ideas, students developed priceless communication and presenting abilities. By means of mentor contacts, they acquired industry best practices and professional networking skills. The knowledge improved their project documentation, visual communication via poster design, and prototype presentation ability. Students developed their inventions depending on professional advice and learnt to analyse technical criticism. The showcase improved their responses to challenging questions, defence of design decisions, and clear value proposition expression. Through mentor direction, participants also gained entrepreneurial attitudes and knowledge of market dynamics.
