| **Write up** | The Department of Electronics and Communication Engineering hosted an expert lecture on "DSP-Industrial Usage" on June 20, 2024. The speaker, Mr. Sagar Somashekar, a Senior Architect at Nokia Networks in Bangalore, highlighted the critical role of Digital Signal Processing (DSP) across various industries. DSP's ability to efficiently process and manipulate digital signals makes it indispensable in many fields. In the audio and multimedia industry, DSP is used for audio coding, noise reduction, and video compression. In telecommunications, it is employed for speech coding, channel coding, and software-defined radio implementations. In biomedical engineering, DSP is crucial for processing biomedical signals, medical imaging, and hearing aids. The session was attended by approximately 126 students, primarily from the 4th semester. |
