NEW HORIZON COLLEGE OF ENGINEERING

INSTITUTION

Vision

To emerge as an institute of eminence in the fields of engineering, technology and management in serving the industry and the nation by empowering students with a high degree of technical, managerial and practical competence.

Mission

1. To strengthen the theoretical, practical and ethical dimensions of the learning process by fostering a culture of research and innovation among faculty members and students.
2. To encourage long-term interaction between the academia and industry through their involvement in the design of curriculum and its hands-on implementation.
3. To strengthen and mould students in professional, ethical, social and environmental dimensions by encouraging participation in co-curricular and extracurricular activities.

Quality Policy

To provide educational services of the highest quality both curricular and co-curricular to enable students integrate skills and serve the industry and society equally well at global level.

Values

- | | |
|--------------------|-------------------------|
| ❖ Academic Freedom | ❖ Professionalism |
| ❖ Innovation | ❖ Inclusiveness |
| ❖ Integrity | ❖ Social Responsibility |

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

VISION

To create high quality engineering professionals who can serve the society and earn global recognition.

MISSION

- To build strong foundation in Electronics and Communication Engineering aspects by exposing students to state of the art technology and research.
- To strengthen the curriculum through interaction with industry experts to equip the students with the required competency.
- To mould students to share technical knowledge and to practice professional and moral values.

Program Education objectives (PEOs)

PEO1	To produce graduates with understanding of fundamentals and applications of Electronics and Communication Engineering.
PEO2	To hone graduates with ability to apply, analyze, design and develop electronic systems.
PEO3	To enhance graduates with latest technologies to enable them to engineer products for real world problems in Electronics and Communication Engineering
PEO4	To build leadership qualities, management skills, communication skills, moral values, team spirit and lifelong learning ability for the graduates.

PEO to Mission Statement Mapping

Mission Statements	PEO1	PEO2	PEO3	PEO4
To build strong foundation in Electronics and Communication Engineering aspects by exposing students to state of the art technology and research.	3	3	3	2
To strengthen the curriculum through interaction with industry experts to equip the students with the required competency.	2	3	3	2
To mould students to share technical knowledge and to practice professional and moral values.	1	2	2	3

Correlation: 3- High, 2-Medium, 1-Low

KNOWLEDGE AND ATTITUDE PROFILE (WK)

S. No	Knowledge and Attitude Profile (WK)
1	WK1: A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.
2	WK2: Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.
3	WK3: A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline
4	WK4: Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.
5	WK5: Knowledge, including efficient resource use, environmental impacts, whole-life cost, re use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.
6	WK6: Knowledge of engineering practice (technology) in the practice areas in the engineering discipline.
7	WK7: Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.
8	WK8: Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.
9	WK9: Ethics, inclusive behaviour and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes.

PROGRAM OUTCOMES (POs)

S. No	Graduate Attributes	Program Outcomes (POs)
1	Engineering Knowledge	PO1: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
2	Problem Analysis	PO2: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
3	Design/Development of Solutions	PO3: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life

		cost, net zero carbon, culture, society and environment as required. (WK5)
4	Conduct Investigations of Complex Problems	PO4: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
5	Engineering Tool Usage	PO5: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
6	The Engineer and The World	PO6: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
7	Ethics	PO7: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
8	Individual and Collaborative Team work	PO8: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
9	Communication	PO9: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.
10	Project Management and Finance	PO10: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
11	Life-Long Learning	PO11: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8).

Program Specific Outcomes

PSO1	To demonstrate the ability to design and develop complex systems in the areas of next generation Communication Systems, IoT based Embedded Systems, Advanced Signal and Image Processing, latest Semiconductor technologies, RF and Power Systems.
PSO2	To demonstrate the ability to solve complex Electronics and Communication Engineering problems using latest hardware and software tools along with analytical skills to contribute to useful, frugal and eco-friendly solutions.

Mapping of PEOs to POs & PSOs

	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	P012	PS01	PS02

PCC: Professional Core Course, **PCCL:** Professional Core Course laboratory, **UHV:** Universal Human Value Course, **NCMC:** Non-Credit Mandatory Course, **AEC:** Ability Enhancement Course, **PEC:** Professional Elective Course, **PROJ:** Mini Project work **L:** Lecture, **T:** Tutorial, **P:** Practical **S:** SDA: Self Study for Skill Development, **CIE:** Continuous Internal Evaluation, **SEE:** Semester End Evaluation

AEC* (Skill Based Core Course):

Credit for AEC* with 03 (L: T: P: S) credits can be considered as (3: 0: 0: 0). The teaching and learning of these Courses will be based on hands-on. The Course content will be from Industry Certification Course Content. The Course Assessment will be based on CIE and SEE in practical mode.

Societal Based Mini Project **:

The Mini project can be done in any lab across college. A common slot in time table can be allotted across all departments.

Mini Project is a laboratory-oriented/hands on course that will provide a platform to students to enhance their practical knowledge and skills by the development of small systems/applications etc. Based on the ability/abilities of the student/s and recommendations of the mentor. A student can do mini project as

- (i) A group of 2 if mini project work is single discipline (applicable to all IT allied branches)
- (ii) A group of 3- 4 if mini project work is single discipline (applicable to all Core Branches)
- (iii) A group of 3 - 4 students if the Mini Project work is a multidisciplinary (Applicable to all Branches)

CIE procedure for Mini-project:

(i) Single discipline: The CIE marks shall be awarded by a committee consisting of the Head of the concerned Department and two faculty members of the Department, one of them being the Guide. The CIE marks awarded for the Mini-project work shall be based on the evaluation of the project report, project presentation skill, and question and answer session in the ratio of 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.

(ii) Interdisciplinary: Continuous Internal Evaluation shall be group-wise at the college level with the participation of all the guides of the project.

The CIE marks awarded for the Mini-project, shall be based on the evaluation of the project report, project presentation skill, and question and answer session in the percentage ratio of 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.

Industrial Open Elective Courses-I:

Credit for OEC is 03 (L: T: P: S) can be considered as (3: 0: 0 : 0). The teaching and learning of these Courses will be based on hands-on. The Course Assessment will be based on CIE and SEE in practical mode. This Courses will be offered by Centre of Excellence to students of all the branches. Registration to Industrial open electives shall be documented and monitored on college level.

National Service Scheme /Physical Education/Yoga: All students have to register for any one of the courses namely National Service Scheme (NSS), Physical Education(PE) (Sports and Athletics), and Yoga (YOG) with the concerned coordinator of the course during the first week of III semesters. Activities shall be carried out between III semester to the VI semester (for 4 semesters). Successful completion of the registered course and requisite CIE score is mandatory for the award of the degree. The events shall be appropriately scheduled by the colleges and the same shall be reflected in the calendar prepared for the NSS, PE, and Yoga activities. These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the course is mandatory for the award of degree.

Credit Definition:

1-hour Lecture (L) per week=1Credit
 2-hoursTutorial(T) per week=1Credit
 2-hours Practical / Drawing (P) per week=1Credit
 2-hous Self Study for Skill Development (SDA) per week = 1 Credit

03-Credits courses are to be designed for 40 hours in Teaching-Learning Session
 02- Credits courses are to be designed for 25 hours of Teaching-Learning Session
 01-Credit courses are to be designed for 15 hours of Teaching-Learning Sessions

PCC: Professional Core Course, **PCCL:** Professional Core Course laboratory, **NCMC:** Non-Credit Mandatory Course, **AEC:** Ability Enhancement Course, **PEC:** Professional Elective Course, **OEC:** Open Elective Course, **PROJ:** Project work, **L:** Lecture, **T:** Tutorial, **P:** Practical **S:** **SDA:** Self Study for Skill Development, **CIE:** Continuous Internal Evaluation, **SEE:** Semester End Evaluation.

Professional Elective Course-II			
24ECE641	Smart Sensor Technology	24ECE644	Image Processing
24ECE642	RTL Design and Verification	24ECE645	Machine Learning Algorithms
24ECE643	Optical Communication		

Ability Enhancement Course – V			
24ECE651	Computer-aided Simulation of Antennas	24ECE654	EMF programming using Octave
24ECE652	FPGA verification using Chipscope	24ECE655	Timing Optimization using Cadence
24ECE653	Linux and Shell Programming		

Industrial Open Elective Courses-II:

Credit for OEC is 03 (L: T: P: S) can be considered as (3: 0: 0 : 0). The teaching and learning of these Courses will be based on hands-on. The Course Assessment will be based on CIE and SEE in practical mode. This Courses will be offered by Centre of Excellence to students of all the branches. Registration to Industrial open electives shall be documented and monitored on college level.

Professional Elective Courses (PEC): A professional elective (PEC) course is intended to enhance the depth and breadth of educational experience in the Engineering and Technology curriculum. Multidisciplinary courses can be added to supplement the latest trend and advanced technology in the selected stream of engineering.

Cap Stone Project Phase-I:

Students have to discuss with the mentor /guide and with their help he/she has to complete the literature survey and prepare the report and finally define the problem statement for the project work.

The objective of the Project work is

- To encourage independent learning and the innovative attitude of the students.
- To develop interactive attitude, communication skills, organization, time management, and presentation skills.
- To impart flexibility and adaptability.
- To inspire team working.
- To expand intellectual capacity, credibility, judgment and intuition.
- To adhere to punctuality, setting and meeting deadlines.
- To install responsibilities to oneself and others.
- To train students to present the topic of project work in a seminar without any fear, face the audience confidently, enhance communication skills, involve in group discussion to present and exchange ideas.

CIE procedure for Project Work:

- 1. Single discipline:** The CIE marks shall be awarded by a committee consisting of the Head of the concerned Department and two senior faculty members of the Department, one of whom shall be the Guide.

The CIE marks awarded for the project work, shall be based on the evaluation of the project work Report, project presentation skill, and question and answer session in the percentage ratio of 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.

- 2. Interdisciplinary:** Continuous Internal Evaluation shall be group-wise at the college level with the participation of all guides of the college. Participation of external guide/s, if any, is desirable. The CIE marks awarded for the project work, shall be based on the evaluation of project work Report, project presentation skill, and question and answer session in the percentage ratio of 50:25:25. The marks awarded for the project report shall be the same for all the batch mates.

SEE procedure for Project Work: SEE for project work will be conducted by the two examiners appointed by the University. The SEE marks awarded for the project work shall be based on the evaluation of project work Report, project presentation skill, and question and answer session in the percentage ratio of 50:25:25.

National Service Scheme /Physical Education/Yoga: All students have to register for any one of the courses namely National Service Scheme (NSS), Physical Education(PE) (Sports and Athletics), and Yoga (YOG) with the concerned coordinator of the course during the first week of III semesters. Activities shall be carried out between III semester to the VI semester (for 4 semesters). Successful completion of the registered course and requisite CIE score is mandatory for the award of the degree. The events shall be appropriately scheduled by the colleges and the same shall be reflected in the calendar prepared for the NSS, PE, and Yoga activities. These courses shall not be considered for vertical progression as well as for the calculation of SGPA and CGPA, but completion of the course is mandatory for the award of degree.

FIFTH SEMESTER SYLLABUS

OPERATIONS RESEARCH AND MANAGEMENT													
Course Code	24ECE51							CIE Marks		50			
L:T:P:S	3:0:0:0							SEE Marks		50			
Hrs / Week	3							Total Marks		100			
Credits	03							Exam Hours		03			
Course outcomes: At the end of the course, the student will be able to:													
24ECE51.1	Apply basic principles of project management and engineering economy to analyse time-cost trade-offs in real-time projects.												
24ECE51.2	Estimate interest rates, cash flows and costs of materials, production and overheads to evaluate the economic feasibility of engineering projects.												
24ECE51.3	Promote entrepreneurship as an individual or as a group by creating awareness on its needs and roles with respect to growth of economic development.												
24ECE51.4	Analyze cost structures and break-even conditions to develop economically viable solutions for small-scale engineering enterprises.												
24ECE51.5	Analyze and solve sequencing problems for n jobs on single, two, three and m machines using appropriate algorithms and graphical methods.												
24ECE51.6	Apply game theory concepts to analyze competitive decision-making problems and determine optimal strategies.												
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:													
	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	PS01	PS02
24ECE51.1	3	3	-	-	-	-	-	-	-	-	3	-	-
24ECE51.2	3	3	-	-	-	-	-	-	-	-	3	-	-
24ECE51.3	3	3	2	-	-	2	-	2	2	2	3	-	-
24ECE51.4	3	3	2	-	2	-	-	-	-	-	3	-	-
24ECE51.5	3	3	2	2	2	-	-	-	-	-	3	-	2
24ECE51.6	2	3	2	2	2	-	-	2	-	-	3	-	2
MODULE-1	PROJECT MANAGEMENT WITH TIME-COST ANALYSIS								24ECE51.1, 24ECE51.2			8 Hours	
Introduction, Definition of project, characteristics of projects, types of projects, need for project management, phases of project life cycle management, impact of delays in project completions, roles and responsibilities of project leader. Engineering Economy: Law of demand and supply, Law of returns; Interest and Interest factors: Interest rate, Simple interest, Compound interest; Cash-flow diagrams for project phases; Personal loans and EMI Payment. Exercises: Numerical problems on simple interest, compound interest, EMI computation and cash-flow diagram construction for real project scenarios.													
Applications		Create a project management plan for a real-time project, construct its cash-flow diagram, and solve EMI and compound-interest problems related to project financing.											
Text Book		Text Book 1: 1.1, 1.1, 1.8, 1.9, 1.10, 1.18, 1.16, Text Book 2: Chapters 1, 2 and 4											
MODULE-2	ENTREPRENEURSHIP, SSI AND COST ESTIMATION								24ECE51.2, 24ECE51.3, 24ECE51.4			8 Hours	
Meaning, Functions, Types & Stages in entrepreneurial process; Role of entrepreneurs in Economic Development. Entrepreneurship in India; women entrepreneurs, Entrepreneurship – its Barriers. SSI; Effect of WTO/GATT; Supporting Agencies of Government for SSI Cost Estimation for SSI: Components of costs – Direct Material Costs, Direct Labour Costs, Fixed Overheads, Factory cost, Administrative Overheads, First cost, Marginal cost, Selling price; Estimation for simple components; Break-even analysis. Exercises: Numerical problems on cost estimation and break-even point calculation for small-scale manufacturing scenarios.													

Case Study	Study women-empowerment-based Small-Scale Industries (SSIs), analyse their cost structure using the component-of-cost framework, and solve break-even problems for a sample SSI product.			
Text Book	Text Book 3: 2.2, 2.3, 2.4 to 2.15, Text Book 2: Chapters 1, 2 and 4			
MODULE-3	SEQUENCING – SINGLE MACHINE AND TWO/THREE MACHINES	24ECE51.5	8 Hours	
Basic assumptions in sequencing; Sequencing 'n' jobs on a single machine using priority rules (FCFS, SPT, LPT, EDD) – algorithm and solved examples. Johnson's Rule – Sequencing 'n' jobs on 2 machines: algorithm, optimality, and numerical examples. Sequencing 'n' jobs on 3 machines – conversion to equivalent 2-machine problem and solved numerical examples.				
Case Study	Analyze job sequencing of <i>n</i> jobs on single and two machines using a real-time manufacturing or service industry example and compare optimal sequences obtained using different priority rules.			
Text Book	Text Book 4: Chapter 11			
MODULE-4	SEQUENCING – MULTIPLE MACHINES AND GRAPHICAL METHOD	24ECE51.5	8 Hours	
Sequencing 'n' jobs on 'm' machines: assumptions, procedure, and numerical examples. Sequencing 2 jobs on 'm' machines using the Graphical Method: construction of the graph, identification of the optimal path, computation of makespan, and worked examples. Exercises: Problems combining n-jobs on m-machines and graphical method; makespan analysis and comparison of sequences				
Self-study	Study applications of multi-machine sequencing in manufacturing and service industries and prepare a brief report on scheduling strategies used in practice.			
Text Book	Text Book 4: Chapter 11			
MODULE-5	GAME THEORY	24ECE51.6	8 Hours	
Formulation of games, Two-person Zero-sum game, games with and without saddle point. Mixed strategies – Expected value method; Graphical solution (2×n and m×2 games); Dominance property. Exercises: Numerical problems on saddle point identification, mixed strategy computation, graphical solution and dominance reduction.				
Case Study	Analyze game theory concepts using real-time examples such as competitive pricing strategies, market entry decisions, or bidding in auctions.			
Text Book	Text Book 4: Chapter 14

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

- Demonstration of project management and cash-flow analysis using a real-time project example.
- Cost estimation exercise: Students estimate production cost and break-even point for a sample SSI product.
- Sequencing problem-solving workshop: Students solve scheduling problems using Johnson's algorithm with real manufacturing datasets.
- Game theory case study: Group discussion on competitive pricing strategies using two-person zero-sum game formulation.

COMMUNICATION SYSTEMS - I													
Course Code	24ECE52							Credits		03			
L:T:P:S	3:0:0:0							CIE Marks		50			
TLP Contact Hours / Sem	45							SEE Marks		50			
TW & SL / Sem	45							Total Marks		100			
Total Hours /Sem	90							Exam Hours		03			
Course outcomes: At the end of the course, the student will be able to:													
24ECE52.1	Analyze the principles and performance characteristics of analog modulation and demodulation techniques												
24ECE52.2	Compare analog modulation schemes based on power efficiency and bandwidth requirements												
24ECE52.3	Analyze Power spectral density, Gaussian processes, and stochastic mobile radio channel models												
24ECE52.4	Examine the fundamentals of digital communication for baseband signal processing and coding techniques												
24ECE52.5	Compare digital modulation techniques based on Bit Error Rate performance												
24ECE52.6	Evaluate optimum receiver techniques for signal detection and estimation												
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:													
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PS01	PS02
24ECE52.1	3	3		2	-	-	-	-	-	-	2	3	2
24ECE52.2	3	3		2	2	-	-	-	-	-	2	3	2
24ECE52.3	3	3		2	2	-	-	-	-	-	2	3	2
24ECE52.4	3	3		2	2	-	-	-	-	-	2	3	2
24ECE52.5	3	3		2	2	-	-	-	-	-	2	3	2
24ECE52.6	3	3		2	2	-	-	-	-	-	2	3	2
MODULE-1	AMPLITUDE MODULATION									24ECE52.1, 24ECE52.2		8 Hours	
Introduction, Amplitude Modulation, Double side band-suppressed carrier modulation, Single Sideband and Vestigial Sideband Methods of Modulation, Frequency- Division Multiplexing.													
Application	VSB transmission in analog and digital television systems.												
Text Book	Text Book 1: 3.1-3.3, 3.5, 3.8												
MODULE-2	ANGLE MODULATION AND RANDOM PROCESSES									24ECE52.1, 24ECE52.2, 24ECE52.3		8 Hours	
Phase and Frequency modulation: Introduction, Basic definitions, Frequency Modulation, Generation of FM Signals, Demodulation of FM Signals, Phase-Locked Loop. Random processes, Ergodic Processes, Power Spectral Density, Gaussian process, Theme Example—Stochastic Model of a Mobile Radio Channel.													
Application	Modelling communication-channel noise using Gaussian random processes and power spectral density.												
Text Book	Text Book 1: 4.1 – 4.6, 5.5, 5.8, 5.12												
MODULE-3	WAVEFORM CODING TECHNIQUES									24ECE52.4		8 Hours	
Practical aspects of sampling and signal recovery, Pulse Amplitude Modulation, Time Division Multiplexing Pulse code modulation, Quantization noise and Signal-to-noise ratio, Discrete PAM signals, Intersymbol Interference, Nyquist's Criterion for Distortion less Baseband Binary Transmission.													
Application	PCM in digital telephony and speech transmission.												

Text Book	Text Book 2: 4.5-4.7, 5.1, 5.3, 6.1, 6.3, 6.4			
MODULE-4	DIGITAL MODULATION TECHNIQUES	24ECE52.5	8 Hours	
Digital Modulation formats, Coherent binary modulation techniques- Coherent Binary PSK, Coherent Binary FSK, Coherent quadrature modulation techniques-Quadri phase-shift keying, Noncoherent binary modulation techniques-Differential PSK, M-ary Modulation Techniques- M-ary QAM.				
Self-study	Comparative BER performance of BPSK, BFSK, QPSK and DPSK over an AWGN channel.			
Text Book	Text Book 2: 7.1, 7.2, 7.3 (1), 7.4 (2), 7.6 (2)			
MODULE-5	DETECTION AND ESTIMATION	24ECE52.6	8 Hours	
Model of Digital Communication System, Gram-Schmidt Orthogonalization procedure, Geometric interpretation of signals, Detection of known signals in noise, Correlation receiver, Matched filter receiver Estimation: concepts and criteria, Maximum Likelihood Estimation.				
Self-study	Signal detection using matched-filter and correlation receivers in the presence of AWGN.			
Text Book	Text Book 2: 3.1–3.3, 3.5, 3.7, 3.8, 3.10, 3.11

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

- Visit to any communication-based company/public sector enterprise.
- Simulation demonstration on modulation processes.
- Video demonstration of latest trends in communication sector.
- Contents related activities (Activity-based discussions)
 - For active participation of students, instruct the students to prepare presentations on 19 current research topics in communication sector.
 - Organizing Group wise discussions on applications or products.
 - Seminars.

COMMUNICATION SYSTEMS – I LAB														
Course Code	24ECL52							CIE Marks		50				
L:T:P:S	0:0:1:0							SEE Marks		50				
Hrs / Week	2							Total Marks		100				
Credits	01							Exam Hours		03				
Course outcomes:														
At the end of the course, the student will be able to:														
24ECL52.1	Demonstrate the generation and detection of analog modulation techniques													
24ECL52.2	Analyze pulse modulation systems and their performance													
24ECL52.3	Examine the different digital modulation schemes used in the field of communication													
24ECL52.4	Evaluate the performance of modulation and demodulation techniques in various transmission environments													
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

Prerequisite Experiments / Programs / Demo														
	- To learn the basics of using MATLAB simulation software, and also to learn the communication system toolbox in MATLAB https://youtu.be/Ul9lup_hjnY										2	NA		
PART-A														
1	To generate amplitude modulation using a transistor.										2	24ECL52.1		
2	Generation and detection of ASK.										2	24ECL52.1		
3	Generation and detection of PAM.										2	24ECL52.1		
4	Generation of PWM.										2	24ECL52.1		
5	Generation of FSK using IC 555 Timer										2	24ECL52.2		
6	Generation of PSK.										2	24ECL52.2		
PART-B														
7	Frequency Modulation and Demodulation using MATLAB.										2	24ECL52.2		
8	Implementation and analysis of QPSK modulation and demodulation.										2	24ECL52.2		
9	Generation and detection of Pulse Code Modulation using MATLAB.										2	24ECL52.3		
10	Realize Time Division Multiplexing and Demultiplexing of two band-limited signals.										2	24ECL52.3		
11	Signal-to-Noise Ratio Calculation Using MATLAB.										2	24ECL52.4		
12	Simulation of QAM Generation and Detection Schemes.										2	24ECL52.4		
PART-C														
Beyond Syllabus Virtual Lab Content														
(To be done during Lab but not to be included for CIE or SEE)														
1. Method to set and measure the depth of modulation and trapezoidal display. https://web.njit.edu/~gilhc/ECE489/ece489-V.htm														
2. Study the envelope of a wideband signal. https://web.njit.edu/~gilhc/ECE489/ece489-VI.htm														
3. Explore Two path channel pass band simulation. https://www.etti.unibw.de/labalive/experiment/two-path-channel-baseband/														

4. Examination of AM transmission - synchronous detector.
<https://www.etti.unibw.de/labalive/experiment/amtransmissionsynchronousdetector/>
5. Encode and decode messages and observe the impact of coding on error detection and correction.
<https://in.mathworks.com/help/comm/ug/error-detection-and-correction.html>
6. Computation of BER for QAM System with AWGN Using MATLAB.
<https://in.mathworks.com/help/comm/gs/use-pulse-shaping-on-16-qam-signal.html>

CMOS VLSI DESIGN													
Course Code	24ECE53							CIE Marks	50				
L:T:P:S	3:0:0:0							SEE Marks	50				
Hrs / Week	4							Total Marks	100				
Credits	03							Exam Hours	03				
Course outcomes: At the end of the course, the student will be able to:													
24ECE53.1	Apply the basic concepts and generic model of MOSFETs to analyze their operating characteristics in CMOS circuits.												
24ECE53.2	Identify the process sequence for the fabrication of ICs and the relevant layout design rules												
24ECE53.3	Apply delay models to analyse the timing characteristics of combinational MOS circuits.												
24ECE53.4	Compare different combinational MOS circuit design styles based on their performance characteristics.												
24ECE53.5	Analyze sequential MOS circuits considering delay and timing constraints.												
24ECE53.6	Evaluate the role and functionality of Data path and array subsystems in CMOS Integrated Circuits												
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:													
	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	PS01	PS02

24ECE53.5	3	3	-	2	-	-	-	-	-	-	2	3	2
24ECE53.6	3	3	1	2	-	-	-	-	-	-	2	3	2
MODULE-1	MOS TRANSISTORS									24ECE53.1		8 Hours	
MOS Transistors: Introduction, MOS transistors, CMOS Logic, Design portioning. MOS Transistor Theory: Introduction, Long-Channel I-V characteristics, C-V Characteristics - Simple MOS Capacitance Models, Non-ideal I-V effects, DC transfer characteristics.													
Self-study			Investigate how to Enhance the Power Efficiency in Mobile Devices with Advanced MOS Transistor Technology.										
Text Book			Text Book-1: 1.3, 1.4, 1.6, 2.1, 2.2, 2.3 (up to 2.3.1), 2.4, 2.5										
MODULE-2	CMOS PROCESSING TECHNOLOGY									24ECE53.2		8 Hours	
CMOS Processing Technology: CMOS Fabrication and Layout, Exercises for stick diagram and layout, CMOS Technologies, Layout Design Rules, CMOS Process Enhancements.													
Case Study		Explore the Significance of CMOS technology in various electronic applications.											
Text Book		Text Book 1: 1.5, 3.1, 3.2, 3.3, 3.4											
MODULE-3	DELAY & COMBINATIONAL CIRCUIT BASICS									24ECE53.3, 24ECE53.4		8 Hours	
Delay: Introduction, Transient Response, RC Delay Model – Effective Resistance, Gate and Diffusion Capacitance, Equivalent RC Circuits, Transient Response, Elmore Delay, Layout Dependence of Capacitance, Linear Delay Model – Logical Effort, Parasitic Delay, Delay in a Logic Gate, Drive. Combinational Circuit Basics: Introduction, Circuit Families – Static CMOS.													
Applications		Optimization of combinational circuits to minimize delay.											
Text Book		Text Book 1: 4.1, 4.2, 4.3 (excluding 4.3.7), 4.4 (up to 4.4.4), 9.1, 9.2 (up to 9.2.1)											
MODULE-4	COMBINATIONAL & SEQUENTIAL CIRCUIT									22ECE53.4, 24ECE53.5		8 Hours	
Combinational Circuit Design: Circuit Families – Ratioed Circuits, Cascode Voltage Switch Logic, Dynamic Circuits- Domino Logic, Silicon-On-Insulator Circuit Design.													
Sequential Circuit Design: Introduction, Sequencing Static Circuits, Circuit Design of Latches and Flip- Flops

Prerequisite Experiments / Programs / Demo														
	• Introduction to CMOS VLSI Design and analog VLSI Design. Introduction to Verilog and System Design using Verilog.										2	NA		
PART-A														
1	Draw the schematic of CMOS Inverter for the given specifications, and verify using Transient and DC Analyses.										2	24ECL53.1 24ECL53.2		
2	Draw the schematic of the following circuits for the given specifications, and verify using Transient and DC Analyses: i) 2-input CMOS NAND gate, ii) 2-input CMOS NOR gate.										2	24ECL53.1 24ECL53.2		
3	Draw the schematic of transmission gate for the given specifications, and verify using Transient and DC Analyses.										2	24ECL53.1 24ECL53.2		
4	Draw the schematic of Common Source amplifiers for the given specifications, and verify the same using Transient, DC and AC Analyses.										2	24ECL53.1 24ECL53.2		
5	Draw the layout of the CMOS Inverter and perform physical verification using DRC, ERC and LVS. Extract RC and back-annotate the same and verify the Design.										2	24ECL53.1 24ECL53.2		
6	Draw the layout for 2-input CMOS NAND gate and perform physical verification using DRC, ERC and LVS. Extract RC and back-annotate the same and verify the Design.										2	24ECL53.1 24ECL53.2		
PART-B														
7	For the following circuits, write the switch level Verilog Code, and verify using Test Bench: i) CMOS inverter, ii) 2-input CMOS NAND and NOR gates.										2	24ECL53.3 24ECL53.4		
8	For the following circuits, write the switch level Verilog Code and verify using Test Bench: i) 2-input EXOR gate using CMOS logic, ii) 2-input EXOR gate using PTL.										2	24ECL53.3 24ECL53.4		

9	Synthesize the following circuits using the gate level Verilog Code, with the given Constraints: i) CMOS inverter, ii) 2-input CMOS NAND and NOR gates.	2	24ECL53.3 24ECL53.4
10	For the following circuits, write the Verilog Code, verify using Test Bench, and then synthesize with the given Constraints: i) 4-bit Parallel adder ii) D Flip-flop.	2	24ECL53.3 24ECL53.4

11	For the following circuits, write the Verilog Code, verify using Test Bench, and then synthesize with the given Constraints: i) T Flip-flop, ii) 4-bit Synchronous counter.	2	24ECL53.3 24ECL53.4
12	Write the Verilog Code for Sequence detector using Moore model, verify using Test Bench, and then synthesize with the given Constraints.	2	24ECL53.3 24ECL53.4

PART-C
Beyond Syllabus Virtual Lab Content (4 Hours)
(To be done during Lab but not to be included for CIE or SEE)

1. MOSFET – To plot the (i) output characteristics & (ii) transfer characteristics of an n-channel and p-channel MOSFET
http://vlsi-iitg.vlabs.ac.in/MOSFET_theory.html
2. Ring Oscillator - To design and plot the output characteristics of a 3-inverter ring oscillator.
http://vlsi-iitg.vlabs.ac.in/RingOscillator_theory.html
3. 4X1 multiplexer - To design and plot the characteristics of 4x1 digital multiplexer using pass transistor logic.
http://vlsi-iitg.vlabs.ac.in/Multiplexer_theory.html
4. Latches - To design and plot the characteristics of a positive and negative latch based on multiplexers.
http://vlsi-iitg.vlabs.ac.in/Latches_theory.html

MODULE-1	JAVA FUNDAMENTALS								24ECE54.1 24ECE54.6		8 Hours		
Introduction to Java programming, features and applications of Java, JVM, JDK and JRE, installation and IDE setup, structure of a Java program, identifiers, keywords, variables, data types, operators and expressions, type casting and type conversion, user input using the Scanner class, decision-making statements (if, if-else, switch), looping constructs (for, while, do-while), and basic programming applications using control statements.													
Hands on:													
1. Write a Java program to display "Hello World" and understand the structure of a Java program. 2. Write a Java program to perform arithmetic, relational, logical, and bitwise operations. 3. Write a Java program to demonstrate type casting and type conversion. 4. Write a Java program to accept user input using the Scanner class and perform basic calculations. 5. Write a Java program using conditional statements and looping constructs to solve programming problems.													
Applications	Student Grade Calculator and Simple Banking Operations.												
MODULE-2	ARRAYS, STRINGS AND OOP								24ECE54.2 24ECE54.6		8 Hours		
One-dimensional and two-dimensional arrays, array declaration, initialization and traversal, string creation and manipulation using built-in String methods, classes and objects, methods, constructors (default and parameterized), encapsulation using private data members													

Hands on:			
1. Write a Java program to perform operations on one-dimensional and two-dimensional arrays. 2. Write a Java program to perform string manipulation using built-in String methods. 3. Write a Java program to create classes and objects for a real-world application. 4. Write a Java program to demonstrate constructors (default and parameterized). 5. Write a Java program to implement encapsulation using private data members.			
Applications	Student Record Management System.		
MODULE-3	INHERITANCE AND ABSTRACTION	24ECE54.3 24ECE54.6	8 Hours
Inheritance in Java, types of inheritance (single, multilevel and hierarchical), method overloading and method overriding, abstract classes and abstract methods, implementation of abstraction, and interfaces.			
Hands on:			
1. Write a Java program to demonstrate method overloading. 2. Write a Java program to demonstrate single and multilevel inheritance. 3. Write a Java program to demonstrate hierarchical inheritance. 4. Write a Java program to demonstrate method overriding using inheritance. 5. Write a Java program using abstract classes and abstract methods.			
Case Study	Employee Payroll Management System.		
MODULE-4	PACKAGES, EXCEPTIONS AND FILES	24ECE54.4 24ECE54.6	8 Hours
Packages and user-defined packages, access modifiers, importing packages, exception handling using try, catch, finally, throw, and throws, file handling concepts, reading from and writing to text files, and development of Java applications with proper error handling and file operations.			
Hands on:			
1. Write a Java program to create and use user-defined packages. 2. Write a Java program demonstrating access modifiers across different packages. 3. Write a Java program to implement exception handling using try, catch, finally, throw, and throws. 4. Write a Java program to read data from a text file. 5. Write a Java program to write and append data to a text file.			
Applications	Library Management System.		
MODULE-5	COLLECTIONS FRAMEWORK AND WRAPPER CLASSES	24ECE54.5	8 Hours
Introduction to the Java Collections Framework, ArrayList, HashSet, and HashMap, wrapper classes, autoboxing and unboxing, string processing using the String class, commonly used Java API libraries.			
Hands on:			
1. Write a Java program to store and display student names using an ArrayList. 2. Write a Java program to perform basic operations (add, remove, search, display) using a HashSet. 3. Write a Java program to store and display student details using a HashMap. 4. Write a Java program to demonstrate the use of wrapper classes and autoboxing/unboxing.			
Case Study	Student Information Management System.

RESEARCH METHODOLOGY AND IPR											
Course Code	24RMK55						CIE Marks			50	
L: T: P: S	1:0:0:0						SEE Marks			50	
Hours / Week	01						Total Marks			100	
Credits	01						Exam Hours			02	
Course outcomes: At the end of the course, the student will be able to:											
24RMK55.1	Define research problems and formulate research questions and research objectives.										
24RMK55.2	Demonstrate research processes, critical thinking, and academic writing skills.										
24RMK55.3	Understand the statutory provisions and different forms of Intellectual Property Rights (IPRs).										
24RMK55.4	Identify the significance and procedures of patents, including patent filing and protection.										
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:											
Cos	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011
24RMK55.1	3	3	2	2	2	–	–	1	2	–	2
24RMK55.2	3	3	2	2	2	–	–	1	2	–	2

24RMK55.4	3	3	2	1	–	–	1	1	2	–	2
MODULE-1 FORMULATION OF RESEARCH PROBLEM 24RMK55.1 3 Hours											
Research– Meaning and Objectives–Types of Research–Research Approaches–Research Process–Literature Review–Research Problem– Identification and Defining the Research Problem.											
Text Book	Text Book 1: Ch. 1, 2										
MODULE-2 RESEARCH DESIGN PROCEDURES 24RMK55.2 3 Hours											
Meaning of Research Design – Features of a Good Design –Concepts Related to Research Design– Different Research Designs – Basic Principles of Experimental Designs.											
Case Study	To find the solution for the given research problem using different types of research Methods										
Text Book	Text Book 1: Ch. 3										
MODULE-3 INTERPRETATION AND REPORT WRITING 24RMK55.1 24RMK55.2 3 Hours											
Meaning and Technique of Interpretation – Precautions in interpretation – Different Steps in Report Writing – Layout of a Research Report– Types of Report – Mechanics of Writing a Research Report –Conclusion-Referencing in Academic Writing –Bibliography.											
Text Book	Text Book 2: Ch. 14										
MODULE-4 INTRODUCTION TO IPR 24RMK55.3 3 Hours											
Introduction and Significance of Intellectual Property Rights –Types of Intellectual Property Rights–Rationale for Protection of IPR–IPR in India and Abroad–Forms of IPR – Royalty – Copyright – Trademark – Patents – Industrial Designs –Application of Different Forms of IPR– Future Aspects of IPR– Some Examples of IPR.											
Text Book	Text Book 2: Ch. 1 and 2										
MODULE-5 BASICS OF PATENTS 24RMK55.3,24RMK55.4 3 Hours											
Patents and its Basics – Patentable and Non-Patentable Inventions–Patent Application Process (National and International level) –Drafting and Filing a Patent –Types of Patent Applications–Patent Documents–Specification and Claims–Assignment, Licensing, Infringement–Different Layers of International Patent System											
Case Study	Analyze different domains of filed patents										
Text Book	Text Book 2: Ch. 1 and 2

CRITICAL AND CREATIVE THINKING SKILLS											
Course Code	24SDK56							CIE Marks	50		
L:T:P:S	0:0:1:0							SEE Marks	-		
Hrs / Week	2							Total Marks	50		
Credits	1							Exam Hours	02		
Course outcomes: Upon successful completion of this course, the student will be able to:											
24SDK56.1	Demonstrate proficiency in solving quantitative aptitude problems using fundamental concepts										
24SDK56.2	Apply advanced quantitative techniques to address and solve complex real-world problems.										
24SDK56.3	Develop and enhance logical reasoning skills essential for problem-solving in various competitive examinations.										
24SDK56.4	Cultivate critical and creative thinking skills necessary for analytical reasoning and problem-solving.										
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:											
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
24SDK56.1	3	3	-	-	2	-	-	-	-	-	-
24SDK56.2	3	3	-	-	2	-	-	-	-	-	-
24SDK56.3	3	3	-	-	2	-	-	-	-	-	-
24SDK56.4	3	3	-	-	2	-	-	-	-	-	-
MODULE-1			Critical Thinking through Quantitative Analysis					24SDK56.1 24SDK56.2		6 Hours	
Number systems: LCM and HCF of numbers, Squaring and Cubing Techniques, Multiplication Tricks, Divisibility rules, Digit sum method, Speed Math, Simplifications, Approximations. Percentages: Conversion of Fraction to Percentage Table, Percentage Change, Net percentage change/Effective percentage change, Successive Percentage, Concept of more/less percentage, Percentage of percentage, Product constancy, Increased/decreased by P%, Percentage Changes in Numerator and Denominator, Successive Percentage. Averages: Basic concept, Consecutive Numbers, Non-Consecutive Numbers, Equation Concept, True/False concept, Including/Excluding concept, Replacement concept, Average Speed concept.											
MODULE-2			Numerical Techniques for Problem Solving					24SDK56.1 24SDK56.2		6 Hours	
Profit and Loss: Basic concept, Profit Percentage, Loss Percentage, Profit/Loss Percentage, Overall Profit/Loss, Dishonest shopkeeper, More/less loss concept, Discounts Ratio and Proportion: Concept Explanation, Duplicate Ratio, Triplicate Ratio, Direct Proportion, Indirect Proportion, Double rule of three or compound proportion, Ratio in investment, Ratio in partnership, Ratio in averages, Ratio in profit and loss, Ratio in interest rates. Ages: Ratio and sum of ages, Ratio and Product of Ages, Ratio of Present and Future Ages, Ratio of Past and Present Ages. Partnership: Simple Partnership, Compound Partnership, Partnership at Will, Partnership for a Fixed Term, Particular Partnership, General Partnership, Limited Partnership, Limited Liability Partnership.											

MODULE-3		Quantitative Techniques	24SDK56.1 24SDK56.2	6 Hours
Time and Work: Unit work, Combined work, Individual efficiency, Group efficiencies, Time taken by an individual or a group, Work done by an individual or a group, Total work done, Chain Rule Concept, Pipes and Cisterns, 4 Rules of Pipes and Cistern.				
Gamification: Switch Grid, Geo Sudoku, Grid Lock, Number Challenge, Cognitive reasoning games.				
Cognitive Ability: Statements & Conclusions, Statements & Assertions, Statements & Assumptions, Causes & Effects and Flow Charts.				
MODULE-4		Analytical Reasoning and Creative Problem Solving	24SDK56.3 24SDK56.4	6 Hours
Number Series - Missing numbers, Incomplete series - Odd-even series, primes, Fibonacci series, Arithmetic progression, Geometric progression, Harmonic progression, Squares and cubes, Operations on digits, Exponential series, Increasing multiplication, Hybrid series.				
Alphabetical Series - Missing alphabets, incomplete letter series - series of words, series of letters, arrangement of words/letters, letters marked with corresponding numbers sequence, positions of letters, ranking of the word in dictionary; Mixed Series - Missing numbers and words/letters, complete the series. Analogies: Alphabet Classification, Word Classification, Number Classification.				
Coding and Decoding: Coding based on order, Letter to Letter Mapping, Letter to number mapping, Letter to digit mapping, Re-ordering sequences; Word sequencing, Match the word to code, Symbol Coding.				
MODULE-5		Problem Solving through Logical Analysis	24SDK56.3 24SDK56.4	6 Hours
Directions: Eight Directions, Distance, Displacement, Starting and ending points, Referential directions, Directions of shadows, Axis based problems, Actual and conditional directions.				
Seating Arrangements: Linear arrangement, Square Arrangement, Rectangular Arrangement, Circular arrangement, Vertical arrangement, Seating arrangement in a photograph, Tabular arrangement, Hexagonal Seating Arrangement, Complex arrangement, Miscellaneous arrangements.				
Blood Relations: Relations defined, Generation Verticals, Family Tree, Single Person Blood Relations, Mixed/Chain Blood Relations, Symbol based Blood Relation.

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

Activity	Aptitude Topic	Description
Math Relay Race	Percentages, Profit & Loss, Time & Work	• Divide students into teams. Each student solves one question and passes the sheet to the next teammate. The first team to finish with the most correct answers wins.
Puzzle & Seating Challenge	Seating Arrangements, Logical Reasoning	• Give each team a seating arrangement or logic puzzle. Teams compete to solve it within a fixed time.
DI Detective	Data Interpretation	• Provide charts, graphs, or tables. Students answer questions individually or in groups, explaining how they arrived at their answers.
Human Number Line	Number System, Averages, Ratio & Proportion	• Students hold number cards and physically arrange themselves to solve ordering, averages, ratios, or sequence-based problems.
Aptitude Quiz Bowl	Mixed Aptitude Topics	• Conduct a quiz with multiple rounds (MCQs, rapid fire, visual reasoning, puzzles, and calculation challenges). Award points to teams and maintain a leaderboard.

SOCIETAL BASED MINI PROJECT				
Course Code		24ECE57	Credits	01
L:T:P:S		0:0:1:0	CIE Marks	50
TLP Contact Hours / Sem		30	SEE Marks	50
TW & SL / Sem		-	Total Marks	100
Total Hours /Sem		30	Exam Hours	03
Course outcomes:				
At the end of the course, the student will be able to:				
25ECE57.1	Apply engineering fundamentals to identify and analyze real-world societal challenges.			
25ECE57.1	Design and implement an innovative solution addressing a societal need using appropriate technologies.			
25ECE57.1	Evaluate the performance, feasibility, and impact of the developed solution through testing and validation.			
25ECE57.1	Exhibit professional ethics, teamwork, project management, documentation, and communication skills during project execution.			
The Societal based Mini Project shall encourage students to identify and address real-world societal needs through innovative, practical, and sustainable engineering solutions. Students are encouraged to select problems related to healthcare, education, agriculture, environment, energy conservation, accessibility, safety, smart communities, rural development, and public services, considering the needs of diverse sections of society. The project should demonstrate the potential to create social impact, improve quality of life, optimize resources, and promote affordable, frugal, inclusive, and eco-friendly solutions, while considering ethical, safety, cultural, and environmental aspects. Students may work individually or in groups of 2 students for single-discipline projects in IT-allied branches, 3–4 students for single-discipline projects in core branches, and 3–4 students for multidisciplinary projects across branches, based on the project scope and mentor recommendations. The CIE shall be based on the project report, presentation, and question-and-answer session in the ratio of 50:25:25; for single-discipline projects, evaluation shall be carried out by the Head of the Department and two departmental faculty members, including the guide, while interdisciplinary projects shall be evaluated at the college level with participation of all project guides. The project report marks shall be common to all members of the respective group.

CIE component for every semester						Marks					
Presentation - 1						10					

Selection of topic, PHASE - 1		
Commencement of activity and its progress - PHASE - 2	10	
Case study-based Assessment Individual performance	10	
Sector wise study and its consolidation	10	
Video based seminar for 10 minutes by each student at the end of semester with Report.	10	
Total marks for the course in each semester	50	

• Implementation strategies of the project (NSS work).
 • The last report should be signed by NSS Officer, the HOD and principal.
 • At last report should be evaluated by the NSS officer of the institute.
 • Finally, the consolidated marks sheet should be sent to the university and also to be made available at LIC visit.

Suggested Learning Resources:

Reference Books:

1. NSS Course Manual, Published by NSS Cell, VTU Belagavi.
2. Government of Karnataka, NSS cell, activities reports and its manual.
3. Government of India, NSS cell, Activities reports and its manual.

Pre-requisites to take this Course:

1. Students should have a service-oriented mindset and social concern.
2. Students should have dedication to work at any remote place, anytime with available resources and proper time management for the other works.
3. Students should be ready to sacrifice some of the time and wishes to achieve service-oriented targets on time.

Pedagogy:

- In every semester from 3rd semester to 6th semester, each student should do activities according to the scheme and syllabus.
- At the end of every semester student performance has to be evaluated by the NSS officer for the assigned activity progress and its completion.
- At last, in 6th semester consolidated report of all activities from 3rd to 6th semester, compiled report should be submitted as per the instructions.
- State the need for NSS activities and its present relevance in the society and provide real-life examples.
- Support and guide the students for self-planned activities.
- NSS coordinator will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress in real activities in the field.
- Encourage the students for group work to improve their creative and analytical skills.

Plan of Action:

- Student/s in individual or in a group Should select any one activity in the beginning of each semester till end of that respective semester for successful completion as per the instructions of NSS officer with the consent of HOD of the department.
- At the end of every semester, activity report should be submitted for evaluation.
- Practice Session Description:
 - Lecture session by NSS Officer
 - Students Presentation on Topics
 - Presentation - 1, Selection of topic, PHASE – 1
 - Commencement of activity and its progress - PHASE – 2
 - Execution of Activity
 - Case study-based Assessment, Individual performance
 - Sector/ Team wise study and its consolidation
 - Video based seminar for 10 minutes by each student at the end of semester with Report.

Sl No	Topic	Groupsize	Location	Activity execution	Reporting	Evaluation of the Topic
1.	Organic farming, Indian Agriculture (Past, Present and Future) Connectivity for marketing.	May be individual or team	Farmers land/Villages/ roadside / Community area / College campus	Site selection /proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
2.	Waste management- Public, Private and Govt organization, 5 R's.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Site selection /proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
3.	Setting of the information imparting club for women leading to contribution in social and economic issues.	May be individual or team	Women empowerment groups/ Consulting NGOs & Govt Teams / College campus	Group selection/ proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
4.	Water conservation techniques – Role of different stakeholders– Implementation.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	site selection / proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
5.	Preparing an actionable business proposal for enhancing the village income and approach for implementation.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/ proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

6.	Helping local schools to achieve good results and enhance their enrolment in Higher/ technical/ vocational education.	May be individual or team	Local government / private/ aided schools/ Government Schemes officers	School selection/ proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
7.	Developing Sustainable Water management system for rural areas and implementation approaches.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	site selection/ proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
8.	Contribution to any national level initiative of Government of India. For eg. Digital India, Skill India, Swachh Bharat, Atmanirbhar Bharath, Make in India, Mudra scheme, Skill development programs etc.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/ proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
9.	Spreading public awareness under rural outreach programs. (minimum 5 programs)	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/ proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
10.	Organize National integration and social harmony events / workshops / seminars. (Minimum 02 programs).	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Place selection/ proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

11.	Govt. school Rejuvenation and helping them to achieve good infrastructure.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Place selection/ proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

Semester	CONTENT								COs		HOURS	
3 RD 24PED30	Module 1: Orientation A. Lifestyle, B. Fitness C. Food & Nutrition D. Health & Wellness E. Pre-Fitness test.								24PED30.1, 24PED30.2		5 HRS	
	Module 2: General Fitness & Components of Fitness A. Warming up (Free Hand exercises) B. Strength – Push-up / Pull-ups C. Speed – 30 Mtr Dash D. Agility – Shuttle Run E. Flexibility – Sit and Reach F. Cardiovascular Endurance – Harvard step Test								24PED30.2, 24PED30.3		15 HRS	
	Module 3: Recreational Activities A. Postural deformities. B. Stress management. C. Aerobics. D. Traditional Games.								24PED30.3, 24PED30.4		10 HRS	
4 TH 24PED40	Module 1: Ethics and Moral Values A. Ethics in Sports B. Moral Values in Sports and Games								24PED40.1, 24PED40.2		5 HRS	
	Module 2: Specific Games (Anyone to be selected by the student) A. Volleyball – Attack, Block, Service, Upper Hand Pass and Lower hand Pass. B. Throwball – Service, Receive, Spin attack, Net Drop & Jump throw.								24PED40.3		20 HRS	

	C. Kabaddi – Hand touch, Toe Touch, Thigh Hold, Ankle hold and Bonus. D. Kho-Kho – Giving Kho, Single Chain, Pole dive, Pole turning, 3-6 Up. E. Table Tennis – Service (Fore Hand & Back Hand), Receive (Fore Hand & Back Hand), Smash. F. Athletics (Track / Field Events) – Any event as per availability of Ground.		
	Module 3: Role of Organization and administration	24PED40.4	5 HRS
5TH 24PED50	Fitness Components: Meaning and Importance, Fit India Movement, Definition of fitness, Components of fitness, Benefits of fitness, Types of fitness and Fitness tips. Practical Components: Speed, Strength, Endurance, Flexibility, and Agility Athletics: - Track -Sprints: - Starting Techniques: Standing start and Crouch start (its variations) use of Starting Block. - Acceleration with proper running techniques. - Finishing technique: Run Through, Forward Lunging and Shoulder Shrug. - Jumps- Long Jump: Approach Run, Take-off, Flight in the air (Hang Style/Hitch Kick)and Landing - Throws- Shot Put: Holding the Shot, Placement, Initial Stance, Glide, Delivery Stance and Recovery (Perry O'Brien Technique) Handball OR Ball Badminton Handball: A. Fundamental Skills - Catching, Throwing and Ball control, - Goal Throws: Jumpshot, Centershot, Diveshot, Reverseshot. - Dribbling: High and low. - Attack and counter attack, simple counter attack, counter attack from two wings and center. - Blocking, Goal Keeping and Defensive skills. - Game practice with application of Rules and Regulations. B. Rules and their interpretations and duties of officials Ball badminton: A. Fundamental Skills - Basic Knowledge: Various parts of the Racket and Grip. - Service: Short service, Long service, Long-high service. - Shots: Overhead shot, Defensive clearshot, Attacking clearshot, Dropshot, Netshot, Smash. - Game practice with application of Rules and Regulations. B. Rules and their interpretation and duties of officials.	24PED50.1, 24PED50.2, 24PED50.3, 24PED50.4	Total 30 Hrs/ Semester 2 Hrs/week
6TH 24PED60	Athletics: - Track -110 Mtrs and 400Mtrs: - Hurdling Technique: Lead leg Technique, Trail leg Technique, Side Hurdling, Over the Hurdles - Crouch start (its variations) use of Starting Block. - Approach to First Hurdles, In Between Hurdles, Last Hurdles to Finishing.	24PED60.1, 24PED60.2, 24PED60.3, 24PED60.4	Total 30 Hrs/ Semester 2 Hrs/week

	2. Jumps- High jump: Approach Run, Take-off, Bar Clearance (Straddle) and Landing. 3. Throws- Discus Throw: Holding the Discus, Initial Stance Primary Swing, Turn, Release and Recovery (Rotation in the circle). Football OR Hockey Football: A. Fundamental Skills 1. Kicking: Kicking the ball with inside of the foot, Kicking the ball with Full Instep of the foot, Kicking the ball with Inner Instep of the foot, Kicking the ball with Outer Instep of the foot and Lofted Kick. 2. Trapping: Trapping- the Rolling ball, and the Bouncing ball with sole of the foot. 3. Dribbling: Dribbling the ball with Instep of the foot, Dribbling the ball with Inner and Outer Instep of the foot. 4. Heading: In standing, running and jumping condition. 5. Throw-in: Standing throw-in and Running throw-in. 6. Feinting: With the lower limb and upper part of the body. 7. Tackling: Simple Tackling, Slide Tackling. 8. Goal Keeping: Collection of Ball, Ball clearance-kicking, throwing and deflecting. 9. Game practice with application of Rules and Regulations. A. Rules and their interpretation and duties of officials. Hockey: A. Fundamental Skills 1. Passing: Short pass, Longpass, pushpass, hit 2. Trapping. 3. Dribbling and Dozing 4. Penalty stroke practice. 5. Penalty corner practice. 6. Tackling: Simple Tackling, Slide Tackling. 7. Goal Keeping, Ball clearance- kicking, and deflecting. 8. Game practice with application of Rules and Regulations. B. Rules and their interpretation and duties of officials

CIE Assessment Pattern (50 Marks – Practical) –

CIE to be evaluated every semester end based on practical demonstration of Sports and Athletics activities learnt in the semester.

CIE	Marks
Participation of student in all the modules	10
Quizzes – 2, each of 7.5 marks	15
Final presentation / exhibition / Participation in competitions/ practical on specific tasks assigned to the students	25
Total	50

Suggested Learning Resources:

Reference Books:

1. Saha, A.K. Sarir Siksher Ritiniti, Rana Publishing House, Kalyani.
2. Bandopadhyay, K. Sarir Siksha Parichay, Classic Publishers, Kolkata.
3. Petipus, et.al., Athlete's Guide to Career Planning, Human Kinetics.
4. Dharma, P.N. Fundamentals of Track and Field, Khel Sahitya Kendra, New Delhi.
5. Jain, R. Play and Learn Cricket, Khel Sahitya Kendra, New Delhi.
6. Vivek Thani, Coaching Cricket, Khel Sahitya Kendra, New Delhi.
7. Saha, A.K. Sarir Siksher Ritiniti, Rana Publishing House, Kalyani.
8. Bandopadhyay, K. Sarir Siksha Parichay, Classic Publishers, Kolkata
9. Naveen Jain, Play and Learn Basketball, Khel Sahitya Kendra, New Delhi.
10. Dubey H.C., Basketball, Discovery Publishing House, New Delhi.
11. Rachana Jain, Teach Yourself Basketball, Sports Publication.
12. Jack Nagle, Power Pattern Offences for Winning basketball, Parker Publishing Co., New York.
13. Renu Jain, Play and Learn Basketball, Khel Sahitya Kendra, New Delhi.
14. SallyKus, Coaching Volleyball Successfully, Human Kinetics.

YOGA											
Course Code	24YOG50, 24YOG60						CIE Marks		50

SIXTH SEMESTER SYLLABUS

EMBEDDED SYSTEM DESIGN													
Course Code	24ECE61							CIE Marks		50			
L:T:P:S	3:0:0:0							SEE Marks		50			
Hrs / Week	3							Total Marks		100			
Credits	03							Exam Hours		03			
Course outcomes: At the end of the course, the student will be able to:													
24ECE61.1	Analyze the architecture and features of ARM processors for embedded applications												
24ECE61.2	Apply the Cortex-M programmer’s model and instruction set to develop embedded solutions for practical applications												
24ECE61.3	Analyze and evaluate different interrupt mechanisms to select appropriate interrupt strategies for embedded system applications												
24ECE61.4	Apply exception handling techniques to enhance the reliability and fault tolerance of real-time embedded systems..												
24ECE61.5	Design and integrate hardware-software co-design methodologies and firmware development strategies for embedded products.												
24ECE61.6	Analyze the role and significance of Real-Time Operating Systems (RTOS) in managing tasks, resources, and timing constraints in embedded applications.												
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:													
	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	PS01	PS02
24ECE61.1	3	3	-	-	-	-	-	-	-	-	2	3	2
24ECE61.2	3	-	2	-	3	-	-	-	-	-	2	3	2
24ECE61.3	3	3	-					-	-	-	2	3	2
24ECE61.4	3	-	2	-	3	-	-	-	-	-	-	3	2
24ECE61.5	3	3	2	-	-	-	-	-	-	-	-	3	2
24ECE61.6	3	3	-	2	3	-	-	-	-	-	2	3	2
MODULE-1	Introduction to ARM EMBEDDED SYSTEMS									24ECE61.1		8 Hours	
Definition of Embedded System, Embedded Systems v/s general computing systems, history of embedded systems, classification of embedded systems, applications of embedded system, Purpose of embedded systems. The RISC design philosophy, ARM design philosophy, Embedded system software, ARM core data flow model, Registers of ARM processor, Current program status register, architecture revisions, ARM processor families.													
Self-study	Analyze the architecture, design philosophies, software components, processor organization, and real-world applications of ARM-based embedded systems.												
Text Book	Text Book 2: 1.1, 1.2, 1.3, 1.4, 1.5, 1.6 Text Book 1: 1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.6, 2.7												
MODULE-2	ARM CORTEX M PROCESSOR AND INSTRUCTION SET									24ECE61.2		8 Hours	
Block Diagram, Architecture of ARM cortex processor, operation modes and states, registers, special function registers, floating point registers, exceptions and interrupts.													
Data processing Instructions, Branch instructions, Load-store instructions, software interrupt instructions, program status register instructions, loading constants, Introduction to the thumb instruction set.													
Self-study	Study the ARM Cortex processor architecture, registers, exceptions, interrupts, and ARM/Thumb instruction sets.												
Text Book	Text Book 3: 3.14, 4.1, 4.2, 4.4, 4.5 Text Book 1: 3.1, 3.2, 3.3, 3.4, 3.5, 3.6, 4.1												
MODULE-3	EXCEPTIONS AND INTERRUPTS IN ARM PROCESSORS									24ECE61.3, 24ECE61.4		8 Hours	
Overview of exceptions and interrupts, Exception types, overview of interrupt management, Definition of priority, vector table and vector table relocation, Interrupts and pending behaviors, Exception sequence overview.													
Applications	Used for handling real-time events and prioritizing tasks in embedded systems.												
Text Book	Text Book 3:7.1, 7.2, 7.3, 7.4, 7.5, 7.6, 7.7												
MODULE-4	EMBEDDED SYSTEM DESIGN CONCEPTS									24ECE61.5		8 Hours	

Characteristics and Quality attributes of Embedded system, application and domain specific embedded system application, Hardware and Software Co-design, Computational models in embedded design, Embedded firmware design approaches, Embedded firmware development languages.				
Applications	Smart Home Automation System Design and Implementation.			
Text Book	Text Book 2: 4.1, 4.2.1, 4.2.2, 7.1, 7.2, 9.1, 9.2			
MODULE-5	RTOS FOR EMBEDDED SYSTEM DESIGN	24ECE61.6	8 Hours	
Operating system basics, types of operating systems, tasks, process and threads, Multiprocessing and multitasking, task scheduling-non preemptive scheduling, preemptive scheduling, task synchronization-racing and deadlock only.				
Case Study	A real-time traffic signal controller uses an RTOS for multitasking, task scheduling, synchronization, and deadlock-free operation.			
Text Book	Text Book 2: 10.1, 10.2, 10.3, 10.4, 10.5, 10.7.1, 10.7.2, 10.8

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

- Configure ARM Cortex-M GPIO pins to interface LEDs and push buttons, and observe input-output operations through hardware experimentation.
- Implement external and timer interrupts on an ARM microcontroller to study real-time event detection and response mechanisms.
- Develop UART-based communication between an ARM processor and a PC to transmit and receive sensor or user data.
- Connect temperature, light, or motion sensors to an ARM-based embedded system and process the acquired data for monitoring applications.
- Create multiple tasks using an RTOS on an ARM platform to analyze task scheduling, synchronization, and resource management in real-time systems

Pgm. No.	List of Programs										Hours	COs	
Prerequisite Experiments / Programs / Demo													
	• Revisit to 8086 and 8051 programming basic programming • Study of ARM- Cortex M3,M4 processor development board										2	NA	
PART-A													
1	a) Assembly Level Program (ALP) involving instructions for transferring data within the processor. b) Assembly Level Program (ALP) to demonstrate memory access instruction for various data sizes and addressing modes.										2	24ECL61.1	
2	a) Assembly Level Program (ALP) involving logic operations. c) Assembly Level Program (ALP) to illustrate bit field processing instruction.										2	24ECL61.1 24ECL61.2	
3	a) Assembly Level Program (ALP) involving data conversion operations. b) Assembly Level Program (ALP) involving shift and rotate operations.										2	24ECL61.1	
4	a) Assembly Level Program (ALP) to illustrate bit field processing ins b) Assembly Level Program (ALP) to illustrate program flow instruction.										2	24ECL61.2	
5	Assembly Level Program (ALP) to illustrate saturation operation.										2	24ECL61.3	
6	Assembly Level Program (ALP) involving floating point operations.										2	24ECL61.3	
PART-B													
7	Develop a program for performing fundamental operations on a port.										2	24ECL61.4	
8	Interfacing an LED with the ARM STM32F401xx Using a Push Button Input in Embedded C a. With delay b. Without delay										2	24ECL61.4	

9	Create a program for interfacing a stepper motor and controlling its rotation in both clockwise and counterclockwise directions using	2	24ECL61.4
10	Design a program to interface with a DAC and generate various	2	24ECL61.4

	waveforms.		
11	Implement a program to showcase specific characters on a 7-segment LED display.	2	24ECL61.4
12	Write a program to transmit a message using internal UART and display in LCD.(Universal Asynchronous Receiver-Transmitter).	2	24ECL61.4

PART-C
Beyond Syllabus Virtual Lab Content
(To be done during Lab but not to be included for CIE or SEE)

1. PWM Generation for LED Brightness and DC Motor Speed Control

MODULE-1	MODULE : Microwave Sources and Transmission Lines								24ECE62.1 24ECE62.2		8 Hours		
Introduction to EM Wave Equation and parameters. MICROWAVE SOURCES: Introduction to Microwave System and Microwave frequencies. Generation of Microwaves- Reflex Klystron, TWT, Magnetron TRANSMISSION LINES: Equivalent Circuit of a Transmission Line, Transmission Line equations and solutions Analysis of Primary and Secondary Constants. Reflection and Transmission Coefficients, Standing Waves and SWR, Smith Chart, Single Stub matching													
Case Study		Investigate impedance matching techniques in RF communication systems.											
Text Book		Text Book 2: 2.1,2.2,2.3,2.4.2,5.2,6.2,7 Text Book 2 - 0.1, 0.2, 0.3, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6											
MODULE-2	MICROWAVE SOURCES, MICROWAVE NETWORK THEORY AND PASSIVE COMPONENTS								24ECE62.3		8 Hours		
MICROWAVE NETWORK THEORY: Introduction, S matrix representation of multiport networks, Properties of S parameters, S- parameters of a Two-port network with mismatched load. PASSIVE COMPONENTS: Attenuators, Waveguide Tees, Magic Tees, Circulators and Isolators, Directional Couplers- Bethe Hole Coupler.													
Self-study		Analyze Microwave components in Satellite Communication Systems											
Text Book		Text Book 1: 9.1, 9.2, 9.3, 9.5 Text Book 2: 6.1, 6.2, 6.3, 6.4.2, 6.4.14, 6.4.15, 6.4.16											
MODULE-3	ANTENNA FUNDAMENTALS								24ECE62.4		8 Hours		

Introduction, Radiation patterns, Radiation Power Density and intensity, Beam-width, Directivity, Antenna Efficiency, Gain, Beam Efficiency, Bandwidth, Polarization, Input Impedance, Antenna Radiation Efficiency, Vector Effective Length and Equivalent Areas, Maximum Effective Area, Antenna temperature, Friis Equation. Antenna field zones				
Self-study	Study antenna selection for satellite, mobile and radar communication systems			
Text Book	Text Book 3: 2.1- 2.7, 2.9-2.11, 2.13			
MODULE-4	POINT SOURCES AND ARRAYS AND ELECTRIC DIPOLES	24ECE62.5	8 Hours	
POINT SOURCES AND ARRAYS: Point Sources, Power Patterns, Power Theorem, Radiation Intensity, Arrays of two isotropic point sources, Linear Arrays of n Isotropic Point Sources of equal Amplitude and Spacing. ELECTRIC DIPOLES: Introduction, Short Electric Dipole, Fields of a Short Dipole, Radiation Resistance of a Short Electric Dipole, Thin Linear Antenna (Field Analyses)				
Applications	Explore antenna arrays used in 5G base stations and phased-array radar			
Text Book	Text Book 3: 5.1-5.6, 5.9, 5.13, 6.1 - 6.5			
MODULE-5	RADAR AND ITS APPLICATIONS:	24ECE62.6	8 Hours	
Basic Radar, Radar frequencies, The simple form of the Radar equation, Radar block diagram. Introduction to Doppler and MT! Radar, delay line Cancellers, digital MT! processing, Moving target detector, Pulse Doppler Radar, application of Radar. Introduction to Photonic Radar and Quantum Radar				
Applications	Survey applications of radar in autonomous vehicles, defense and weather monitoring.			
Text Book	Text Book 4: 1.1, 1.2, 1.3, 3.1,3.2,3.5, 3.6, 3.9, 1.5

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning:

- Simulate transmission line parameters, SWR, and impedance matching using Smith Chart tools.
- Analyze antenna radiation patterns and antenna parameters using MATLAB/HFSS/CST simulations.
- Investigate radiation characteristics of antenna arrays and dipole antennas through simulation.
- Demonstrate the operation of microwave sources and passive microwave components using virtual laboratory tools.
- Simulate radar systems, Doppler radar, and moving target detection techniques and study their practical applications

COMMUNICATION SYSTEMS - II LAB														
Course Code	24ECL62							CIE Marks			50			
L:T:P:S	0:0:1:0							SEE Marks			50			
Hrs / Week	2							Total Marks			100			
Credits	01							Exam Hours			03			
Course outcomes: At the end of the course, the student will be able to:														
24ECL62.1	Measure the performance parameters of microwave components													
24ECL62.2	Determine the characteristics of microwave components such as directional couplers, resonators and power dividers													
24ECL62.3	Model optical and electromagnetic wave propagation systems to determine propagation loss, bending loss and other system characteristics													
24ECL62.4	Simulate antenna and radar systems to evaluate radiation patterns, gain, directivity, scanning, range, loss and overall system performance.													
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:														
	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO 11	PS01	PS02

Exp. No. / Pgm. No.	List of Experiments / Programs										Hours		Cos	
Prerequisite Experiments / Programs / Demo														
	- Verification of basic gates using IC Trainer board - Basic gate implementation using Verilog code.										2		NA	
PART-A														
1	Measurement of frequency, guide wavelength, power, VSWR and attenuation in microwave test bench.										2		24ECL62.1	
2	To conduct an experiment to find out the insertion loss and coupling factor for the Magic Tee.										2		24ECL62.1 24ECL62.2	
3	Determination of Coupling and isolation characteristics of microstrip directional coupler.										2		24ECL62.2	
4	(a) Resonance characteristics of microstrip ring resonator and computation of dielectric constant of the substrate. (b) Power division and isolation of microstrip power divider.										2		24ECL62.2	
5	Measurement of propagation loss, bending loss and numerical aperture of an optical fiber.										2		24ECL62.3	
6	Measurement of directivity and gain of microstrip dipole and Yagi Antennas										2		24ECL62.4	
PART-B														
7	To simulate electromagnetic wave generation.										2		24ECL62.3	
8	To simulate the radiation pattern of a dipole antenna.										2		24ECL62.4	
9	To simulate the radiation pattern of a uniform linear array.										2		24ECL62.4	
10	To design and analyze radar system for the given requirements of PRF, Range and loss factors.										2		24ECL62.4	
11	To simulate the pulse radar to analyze scanning & processing, while evaluating system performance degradation.										2		24ECL62.4	
12	To simulate and analyze a radar system to evaluate the performance										2		24ECL62.4	

	through waveform generation and Range-Doppler surface clutter prediction.

CISCO: INTRODUCTION TO NETWORKING													
Course Code	24ECE63						CIE Marks		50				
L:T:P:S	3:0:0:0						SEE Marks		50				
Hrs / Week	03						Total Marks		100				
Credits	03						Exam Hours		03				
Course outcomes: At the end of the course, the student will be able to:													
24ECE63.1	Apply the concepts of network types, topologies, and OSI and TCP/IP reference models to solve basic computer networking problems												
24ECE63.2	Analyze data link layer protocols, error detection and correction techniques, and media access control methods for reliable data transmission												
24ECE63.3	Use IP addressing schemes including subnetting, and IPv6 addressing to design structured network configurations												
24ECE63.4	Correlate network layer routing algorithms and protocols such as RIP, OSPF, and BGP to determine optimal data delivery paths												
24ECE63.5	Evaluate transport layer protocols (TCP and UDP), their features, and their role in end-to-end reliable data communication												
24ECE63.6	Interpret the functions of application layer protocols such as DNS, HTTP, FTP, SMTP, and network security fundamentals												
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:													
	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	PS01	PS02

24ECE63.6	3	3	3	3	3	2	2	2	3	2	3	3	3
MODULE-1 NETWORK FUNDAMENTALS AND REFERENCE MODELS 24ECE63.1 8 Hours													
Introduction to Computer Communication Networks: Definition, goals, and applications of computer communication networks. Types of networks: LAN, MAN, WAN, PAN. Network topologies: Bus, Star, Ring, Mesh, Tree, Hybrid. Network Components: Hubs, Switches, Routers, Bridges, Gateways, Repeaters, NICs – functions and comparison. OSI Reference Model: Seven layers, functions of each layer, data encapsulation, peer-to-peer communication. TCP/IP Model: Four-layer architecture, comparison with OSI model, protocols at each layer. Transmission Media: Guided media – Twisted pair, Coaxial cable, Fiber optic; Unguided media – Radio waves, Microwaves, Infrared.													
Hands on:													
1. Implement simple Local Area Network using packet tracer 2. Design Star, Bus topologies 3. Configure Switch using packet tracer 4. Configure Router using packet tracer 5. Verify the connectivity between the devices using packet tracer													
Case Study / Applications	Analyze the network infrastructure of a real-world enterprise and map its components to the OSI model layers.												
MODULE-2 DATA LINK LAYER AND MEDIA ACCESS CONTROL 24ECE63.2 8 Hours													
Data Link Layer: Framing, error detection – Parity check, CRC, checksum; error correction – Hamming code. Media Access Control (MAC): Random access – ALOHA, CSMA, CSMA/CD, CSMA/CA; Controlled access – Token passing, Polling. Ethernet (IEEE 802.3): Frame format, addressing, CSMA/CD operation, Fast Ethernet, Gigabit Ethernet. Wireless LAN (IEEE 802.11): Architecture, frame format, CSMA/CA, Wi-Fi standards (802.11a/b/g/n/ac). Switching :Packet switching, Circuit switching, Packet Switching Versus Circuit Switching.													

Hands on:			
1. Compute each parity bit using even parity over its check positions. 2. Simulate two stations sensing the channel, both finding it idle, transmitting simultaneously, detecting collision, then applying binary exponential backoff. Show the backoff time calculation for attempts 1,2,3. 3. Calculate minimum frame size needed for CSMA/CD to work correctly given a network with a specific propagation delay (relate to the 512-bit-time slot time / 64-byte minimum frame rule). 4. Configure Wireless LAN 5. Draw a call setup for circuit switching (dedicated path, e.g., telephone) vs a packet-switched path (datagram/virtual circuit)			
Case Study / Applications	Simulate error detection using CRC and observe CSMA/CD collision resolution using Cisco Packet Tracer.		
MODULE-3	NETWORK LAYER: IP ADDRESSING AND SUBNETTING	24ECE63.3, 24ECE63.4	8 Hours
IPv4 Addressing: Classful addressing (Class A, B, C, D, E), Classless addressing, Subnetting: Subnet mask, CIDR notation, DHCP IPv6 Addressing: Need for IPv6, address format, types of IPv6 addresses, transition from IPv4 to IPv6 ICMPv4, ICMPv6 – purpose and working. Routing: Static vs dynamic routing, routing algorithms – Distance Vector (Bellman-Ford), Link State (Dijkstra). Routing Protocols: RIP, OSPF, BGP – features, working, and comparison.			
Hands on:			
1. Assign IPv4 Address to the network devices and end devices 2. Assign IPv6 Address to the network devices and end devices 3. Verify subnetting process using packet tracer 4. Verify Static and dynamic routing process using packet tracer 5. Configure RIP protocol			
Case Study / Applications	Configure OSPF		
MODULE-4	TRANSPORT LAYER PROTOCOLS	24ECE63.5	8 Hours
Transport Layer Services: Process-to-process communication, port numbers, well-known and ephemeral ports, sockets. UDP (User Datagram Protocol): Features, datagram format TCP (Transmission Control Protocol): Features, segment format, connection establishment (3-way handshake), connection termination. TCP Flow and Congestion Control: Sliding window, slow start, congestion avoidance, fast retransmit, fast recovery. Comparison of TCP vs UDP: Use cases, advantages and disadvantages.			
Hands on:			
1. Classify the observed port numbers into: Well-known (0–1023), Registered (1024–49151), and Dynamic/Ephemeral (49152–65535). 2. Draw the UDP header format: Source Port (16b), Destination Port (16b), Length (16b), Checksum (16b), followed by Data. 3. Draw a timing diagram of both handshake and termination with the seq/ack numbers you captured, labeling each segment's flags. 4. Simulate a sliding window scenario by hand: sender window size = 4, sequence numbers 0–7 (mod 8). Show the window sliding as ACKs 1, 2, 3, 4 arrive one at a time. 5. Build a comparison table with rows — Connection type, Reliability, Ordering, Flow control, Congestion control, Header overhead, Speed			
Case Study / Applications	Capture and analyze TCP and UDP packets using Wireshark; observe 3-way handshake and congestion control behavior		

MODULE-5	APPLICATION LAYER PROTOCOLS AND NETWORK SECURITY	24ECE63.6	8 Hours
-----------------	---	------------------	----------------

Domain Name System (DNS): Hierarchy, resolution process, resource records, DNS security (DNSSEC).
Web Protocols: HTTP and HTTPS – request/response model, methods, status codes, persistent connections; HTTPS and SSL/TLS.

File and Email Protocols: FTP – modes of operation; SMTP, POP3, IMAP – email architecture and working.
Remote Access and Network Management: Telnet, SSH – comparison; SNMP – architecture, protocol data units.

Network Security Fundamentals: Threats – eavesdropping, spoofing, DoS; security services – confidentiality, integrity, authentication; Firewalls and VPNs.

Hands on:

1. Configure DNS server using packet tracer
2. Configure a basic secure network with VLANs using packet tracer
3. Configure SSH using packet tracer
4. Configure Telnet using packet tracer
5. Configure switchport security

Case Study / Applications Configure inter-VLAN routing using Cisco Packet Tracer.

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

- Discuss smart sensor technologies and real-world engineering applications.
- Explain sensing principles through flipped classroom presentations.
- Analyze smart sensor applications using industry-based case studies.
- Compare application-specific sensors for different engineering scenarios.
- Present emerging trends in wireless and intelligent sensing.

RTL DESIGN AND VERIFICATION														
Course Code	24ECE642							CIE Marks			50			
L:T:P:S	3:0:0:0							SEE Marks			50			
Hrs / Week	3							Total Marks			100			
Credits	03							Exam Hours			03			
Course outcomes: At the end of the course, the student will be able to:														
24ECE642.1	Apply digital design concepts for RTL design and address its design challenges													
24ECE642.2	Illustrate SystemVerilog data types and control structures for efficient implementation of digital systems.													
24ECE642.3	Use object-Oriented Programming concepts to create structured RTL verification													
24ECE642.4	Construct Verilog RTL code using tasks and functions for modular and reusable design.													
24ECE642.5	Devise digital designs to develop and configure UVM-based testbenches and verification environments.													
24ECE642.6	Develop Universal Verification Methodology test benches to verify the functionality of different RTL designs													
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:

24ECE642.6	3	3	2	2	3	-	-	-	-	-	2	3	3	
MODULE-1	Introduction								24ECE642.1			8 Hours		
Digital design through Verilog: Overview of Combinational and Sequential circuits, Bus Structure, Simple processor design, RTL Designs, Goals and Constraints, RTL Based Chip Design Flow, Design Challenges.														
Applications			Design basic combinational circuits and sequential circuits in Verilog.											
Text Book			Text Book 1: Ch 4, 6,7. Text Book 2: Ch 1											
MODULE-2	System Verilog Basics								24ECE642.2			8 Hours		
Different Data Types, User-Defined and Enumerated Types: String Data Types, Event Data Types, User-Defined Types, Enumerated Types, Nets, Reg, Logic, Type Casting, Constants, Attributes, Packed Array and Unpacked Array, Dynamic, Associate Array, Its Methods, QUEUE Operators and Expressions, Control Structure: If-Else, Switch, Loop, repeat, break, continue, unique.														
Self-study		Dynamic and Associative Arrays in System Verilog												
Text Book		Text Book 3: Ch 2.												
MODULE-3	System function and Inter Process communication								22ECE642.3			8 Hours		

		24ECE642.4	
System Tasks and System Functions, Processes: Combinational Logic, Latch Logic, Sequential Logic, Fork Join (Join, Join_Any, Join_None), Event Controls, Process Control Inter process Communication: OOPS, Semaphores, Mailboxes, Constraints, Randomization.			
Self-study	Analyze how constraints and randomization are used in creating efficient and robust testbenches for verification.		
Text Book	Text Book 3: Ch 3.1,3.2,3.3,5.5-5.11,6.2-6.4,7.1, 7.5, 7.6,7.6.1		
MODULE-4	UVM Overview	24ECE642.5	8 Hours
UVM Test Bench and Environment, Interface UVCs, Module and System UVCs, Test Benches, System Verilog UVM Class Library, UVM Library Basics, UVM Sequences, UVM Sequencers			
Case Study	Develop a UVM test bench environment for verifying the functionality and performance of a UART (Universal Asynchronous Receiver/Transmitter) communication protocol.		
Text Book	Text Book 4: Ch 2,4,5		
MODULE-5	Simple Test Bench Integration	24ECE642.5, 24ECE642.6	8 Hours
Test Benches and Test, creating a simple test bench, Virtual sequencer, Test bench Configuration, creating a test, Virtual sequences, Checking DUT Correctness, Implementing a coverage model.			
Self-Study	Understand the purpose and function of each component in the test bench, and how they interact to test a digital design.		
Text Book	Text Book 4: Ch 7

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

- Digital circuit Simulation to test and debug verilog design.
- Video demonstration of end-to-end process of RTL design
- Contents related activities (Activity-based discussions)
 - For active participation of students, instruct the students to prepare Flowcharts and Handouts.
 - Organizing Group wise discussions on issues
 - Course Mini Projects
 - Programming assignments

OPTICAL COMMUNICATION													
Course Code	24ECE643							Credits	03				
L:T:P:S	3:0:0:0							SEE Marks	50				
Hrs / Week	3							Total Marks	100				
Credits	03							Exam Hours	03				
Course outcomes: At the end of the course, the student will be able to:													
24ECE643.1	Apply the fundamental principles of optical fiber communication to analyze modern communication systems												
24ECE643.2	Select suitable optical fiber structures based on specific application requirements												
24ECE643.3	Analyze the effects of channel impairments on the performance of optical fiber communication systems												
24ECE643.4	Evaluate the performance of optical receivers based on system parameters												
24ECE643.5	Analyze optical multiplexing techniques for efficient networking applications												
24ECE643.6	Analyze optical amplification techniques for improving the performance of optical communication systems												
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:													
	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	PS01	PS02
24ECE643.1	3	-	-	-	-	-	-	-	-	-	1	3	2
24ECE643.2	3	-	-	-	-	-	-	-	-	-	1	3	2

24ECE643.6	3	3	-	-	2	-	-	-	-	-	1	3	2
MODULE-1	OVERVIEW OF OPTICAL FIBER COMMUNICATION							24ECE643.1			8 Hours		
Historical development, The General System, advantages, disadvantages, and applications of optical fiber communication, Ray theory, Electromagnetic mode theory, cylindrical fiber (no derivations in section 2.4.4), single mode fiber, cutoff wave length, mode field diameter.													
Case Study	Evolution from copper links to fiber-optic backbone and submarine communication systems.												
Text Book	Text Book 1: 1.1, 1.2, 1.3, 2.1, 2.2, 2.3.1,2.3.2,2.3.3,2.4, 2.5.1, 2.5.2												
MODULE-2	OPTICAL SOURCES AND TRANSMISSION CHARACTERISTICS OF OPTICAL FIBERS							24ECE643.2, 24ECE643.3			8 Hours		
Optical sources: LED, power and efficiency, LED structures, LED characteristics, LASER basic concepts, The Semiconductor Injection LASER Attenuation, absorption, scattering losses, bending loss, dispersion, Chromatic dispersion, Inter modal dispersion.													
Application	Source selection and impairment mitigation for a high-speed fiber-optic link.												
Text Book	Text Book 1: 7.2,7.3.1,7.3.2,7.3.3,7.3.4, 7.4, 6.2,6.4, 3.1, 3.2 3.3, 3.4, 3.6, 3.8, 3.9, 3.10												
MODULE-3	PHOTODETECTION DEVICES AND OPTICAL RECEIVERS							24ECE643.4 24ECE643.5			8 Hours		
Operation of Photo diodes, The pin Photodetector, Basics of Avalanche Photodiodes, Basic Receiver Operation, performance characteristics of digital receivers, principles of Eye diagrams.													
Application	Design of a 10-km digital optical link using power and rise-time budgets.												
Text Book	Text Book2: 6.1, 7.1-7.3												
MODULE-4	OPTICAL AMPLIFIERS							24ECE643.5 24ECE643.6			8 Hours		
Fundamental Optical amplifier types, semiconductor optical amplifiers, Erbium-doped fiber amplifiers, noises generated in Optical amplifiers, Optical Signal-To-Noise Ratio (OSNR).													

Case Study	Comparison of EDFA, SOA amplifiers for metro and long-haul systems.			
Text Book	Text Book 2: 11.1 - 11.5			
MODULE-5	WDM CONCEPTS AND FIBER OPTIC COMMUNICATION NETWORKS	24ECE6435.5	8 Hours	
Concepts of WDM, Mach-Zehnder interferometry Techniques, Non-reciprocal Isolators and circulators, Concepts of Optical networks, Common network topologies, Basic SONET/SDH concepts, Schemes for Optical Add/Drop Multiplexing.				
Case Study	PON-based FTTH deployment for a smart-city access network.			
Text Book	Text Book2: 10.1, 10.2.5, 10.3, 13.1-13.3, 13.5

IMAGE PROCESSING													
Course Code	24ECE644							CIE Marks		50			
L:T:P:S	3:0:0:0							SEE Marks		50			
Hrs / Week	3							Total Marks		100			
Credits	03							Exam Hours		03			
Course outcomes:													
At the end of the course, the student will be able to:													
24ECE644.1	Explain the fundamentals of digital image processing.												
24ECE644.2	Analyze image formation and the role of the human visual system in grayscale image perception.												
24ECE644.3	Apply image processing techniques in both the spatial and frequency (Fourier) domains.												
24ECE644.4	Design and evaluate image analysis techniques for effective image processing.Design and evaluate image analysis techniques												
24ECE644.5	Analyze image restoration techniques based on their performance and application requirements.												
24ECE644.6	Apply morphological operations to binary and grayscale images for image analysis												
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:													
	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	PS01	PS02

24ECE644.6	3	3	2	1	3	-	-	-	-	-	-	3	2
MODULE-1	Image Fundamentals								24ECE644.1		8 Hours		
What is Digital Image Processing? Origins of Digital Image Processing, Examples of fields that use DIP, Fundamental Steps in Digital Image Processing, Components of an Image Processing System, Elements of Visual Perception, Image Sensing and Acquisition.													
Self-study		Applications of Digital Image processing											
Text Book		Text Book 1: 2.1, 2.2, 2.6.2											
MODULE-2	Image Enhancement in the Spatial Domain								24ECE644.2		8 Hours		
Image Sampling and Quantization, Some Basic Relationships Between Pixels, Linear and Nonlinear Operations. Some Basic Intensity Transformation Functions, Histogram Processing, Fundamentals of Spatial Filtering, Smoothing Spatial Filters, Sharpening Spatial Filters.													
Self-study		Spatial Filtering											
Text Book		Text Book 1: 2.3, 2.4, 2.5, 2.6.2, 3.2, 3.3,3.4, 3.5 3.6											
MODULE-3	Frequency Domain								24ECE644.3, 24ECE644.4		8 Hours		
Preliminary Concepts, The Discrete Fourier Transform (DFT) of Two Variables, Properties of the 2-DDFT, Filtering in the Frequency Domain, Image Smoothing and Image Sharpening Using Frequency Domain Filters, Selective Filtering													
Case Study		Selective Filtering for Binary image											
Text Book		Text Book 1: 4.2, 4.5, 4.6, 4.7, 4.8, 4.9 4.10											
MODULE-4	Image Restoration								24ECE644.5		8 Hours		
Noise models, Restoration in the Presence of Noise Only using Spatial Filtering and Frequency Domain Filtering, Linear, Position-Invariant degradations Estimating the Degradation Function, Inverse Filtering, Minimum Mean Square Error (Wiener) Filtering, Constrained Least Squares Filtering.													

Self-study	Frequency Domain Filtering			
Text Book	Text Book 1: 5.2, 5.3, 5.4, 5.5, 5.6, 5.7,5.8, 5.9			
MODULE-5	Morphological Analysis	24ECE644.6	8 Hours	
Morphological Image Processing: Preliminaries, Erosion and Dilation, Opening and Closing, The Hit-or-Miss Transforms, Some Basic Morphological Algorithms. Representation and Description: Representation, Boundary descriptors.				
Application	Implementation of Boundary descriptors			
Text Book	Text Book 1: 9.1, 9.2, 9.3, 9.4, 11.2,11.3

MODULE-1	INTRODUCTION TO MACHINE LEARNING									24ECE645.1		8 Hours	
Introduction to Machine Learning: Need for Machine Learning, Machine Learning Explained, Machine Learning in Relation to Other Fields, Types of Machine Learning, Challenges of Machine Learning, Machine Learning Process, Machine Learning Application.													
Understanding Data: Introduction, Big Data Analytics and Types of Analytics, Big Data Analysis Framework, Descriptive Statistics, Univariate Data Analysis and Visualization, Bivariate Data and Multivariate Data.													
Applications			Create histograms and box plots for all numerical features and analyze the distribution of each feature, Use California Housing dataset.										
Text Book			Textbook 1: 1.1-1.7, 2.1-2.6										
MODULE-2	BASICS OF LEARNING THEORY									24ECE645.2		8 Hours	
Understanding Data: Multivariate Statistics, Essential Mathematics for Multivariate Data, Overview of Hypothesis, Feature Engineering and Dimensionality Reduction Techniques.													
Basics of Learning Theory: Introduction to Learning and its Types, Introduction to Computation Learning Theory, Design of a Learning System, Introduction to Concept Learning, Induction Biases, Modelling in Machine Learning.													
Applications		Compute and visualize the correlation matrix to understand the relationships between pairs of features using heatmap, Use California Housing dataset.											
Text Book		Textbook 1: 2.7-2.10, 3.1 – 3.6											
MODULE-3	REGRESSION ANALYSIS									24ECE645.3		8 Hours	
Similarity-based Learning: Introduction to Similarity or Instance-based Learning, Nearest-Neighbor Learning, Weighted K-Nearest-Neighbor Algorithm, Nearest Centroid Classifier, Locally Weighted Regression (LWR).													
Regression Analysis: Introduction to Regression, Introduction to Linearity, Correlation, and Causation, Introduction to Linear Regression, Validation of Regression Methods, Multiple Linear Regression, Polynomial Regression, Logistic Regression.													
Applications		Demonstrate the working of Linear Regression and Polynomial Regression, Use Boston Housing Dataset for Linear Regression and Auto MPG Dataset (for vehicle fuel efficiency prediction) for Polynomial Regression.											

Text Book	Textbook 1: 4.1 – 4.5, 5.1 – 5.7		
MODULE-4	DECISION TREE and BAYESIAN LEARNING	24ECE645.4, 24ECE645.5	8 Hours
Models Based on Decision Trees: Introduction to Decision Tree, Decision Tree for Classification, Impurity Measures for Decision Tree Construction, Properties of Decision Tree Classifier (DTC), Applications in Breast Cancer Data, Regression Based on Decision Tress.			
Bayesian Learning: Introduction to Probability-based Learning, Fundamentals of Bayes Theorem, Classification Using Bayes Model.			
Case Study	Applying Naive Bayes Classifier for Email Spam Detection.		
Text Book	Textbook 2: 3.1 – 3.6, Textbook 1: 8.1 – 8.3		
MODULE-5	CLUSTERING and REINFORCEMENT LEARNING	24ECE645.4, 24ECE645.5, 24ECE645.6	8 Hours
Clustering: Introduction to Clustering, Clustering of Patterns, Divisive Clustering, Agglomerative Clustering, Partitional Clustering.			
Reinforcement Learning: Overview and Scope of Reinforcement Learning, Components of Reinforcement Learning, Q-Learning.			
Applications	Developing an Intelligent Tutoring System Using Explanation-Based Learning and Reinforcement Learning.		
Text Book	Textbook 2: 7.1 – 7.5, Textbook 1: 14.1, 14.2, 14.4, 14.9

	- Introduction to the software platform and laboratory environment. - Basic modeling, parameter setting, and simulation workflow. - Generation and interpretation of output results and reports.										2	NA	
PART-A													
1	Familiarization with HFSS Interface, Project Setup, Materials and Boundary Conditions.										2	24ECE651.1	
2	Creation of basic 3D objects and assignment of ports and excitations.										2	24ECE651.1	
3	Design and simulation of Monopole Antenna.										2	24ECE651.2	
4	Design and simulation of Half-Wave Dipole Antenna.										2	24ECE651.2	
5	Design and simulation of Folded Dipole Antenna.										2	24ECE651.2	
6	Design and analysis of wideband antennas (Conical & Bow-Tie antennas).										2	24ECE651.2, 24ECE651.3	
PART-B													
7	Design and simulation of Rectangular Microstrip Patch Antenna at 2.4 GHz.										2	24ECE651.2	
8	Design and simulation of circular Microstrip Patch Antenna at 2.4 GHz.										2	24ECE651.2	
9	Parametric analysis of Patch Antenna dimensions and substrate properties.										2	24ECE651.3	
10	Design and simulation of Rectangular Microstrip Patch Antenna at 5.2 GHz.										2	24ECE651.2, 24ECE651.3	
11	Design and simulation of circular Microstrip Patch Antenna at 5.2 GHz.										2	24ECE651.2, 24ECE651.3	
12	Design and analysis of a 2x2 antenna array using HFSS simulation software for 3.5 GHz.										2	24ECE651.4	

PART-C

FPGA VERIFICATION USING CHIPSCOPE														
Course Code	24ECE652							CIE Marks		50				
L:T:P:S	0:0:1:0							SEE Marks		50				
Hrs / Week	2							Total Marks		100				
Credits	01							Exam Hours		03				
Course outcomes:														
At the end of the course, the student will be able to:														
24ECE652.1	Set up and configure the FPGA on-chip debug environment, including JTAG connectivity, ChipScope/ILA core insertion, and bitstream download to target hardware													
24ECE652.2	Configure and apply single, Boolean, sequential, and bus-level trigger conditions in the Integrated Logic Analyzer to capture and verify the behavior of digital circuits such as counters, FSMs, and memory controllers on real hardware													
24ECE652.3	Employ the Virtual Input/Output (VIO) core for real-time stimulus and monitoring, and verify the timing and data integrity of serial communication protocols (UART/SPI/I2C) using on-chip capture													
24ECE652.4	Analyze multi-clock domain designs for clock-domain-crossing issues and execute a complete on-chip verification cycle — from debug planning to root-cause analysis and design correction — on a representative digital system													
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:														
	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	PS01	PS02

24ECE652.4	3	3	2	2	3	-	-	3	-	-	2	3	3	
Exp. No. / Pgm. No.	List of Experiments / Programs										Hours	COs		
Prerequisite Experiments / Programs / Demo														
	- Verification of basic gates using IC Trainer board - Basic gate implementation using Verilog code.										2	NA		
PART-A														
1	Study the FPGA on-chip debug and verification flow, and to configure the ChipScope tool environment by establishing JTAG connectivity between the host PC and the target FPGA development board.										2	24ECE652.1		
2	Design a synchronous counter using Hardware Description Language and to verify its functionality on FPGA hardware by manually instantiating ChipScope ICON and ILA cores within the source design.										2	24ECE652.1		
3	Design and Verify the functionality of a Finite State Machine implemented on FPGA by inserting ChipScope debug cores into the post-synthesis net-list using the CoreInserter utility, without modification of the original source code.										2	24ECE652.1		
4	Implement a shift register design on FPGA and to verify its operation using the Vivado-native Integrated Logic Analyzer flow, by marking debug signals and generating the corresponding probes file and bitstream.										2	24ECE652.1		
5	Download the generated bitstream onto the target FPGA device through the JTAG interface and to establish a live debug session using the Hardware Manager/ChipScope Analyzer for real-time observation of internal signals.										2	24ECE652.1		

6	Capture and verify the rollover event of a hardware counter by configuring single-bit edge and level triggering conditions in the Integrated Logic Analyzer.	2	24ECE652.2
PART-B			
7	Design and verify a traffic light controller Finite State Machine on FPGA by configuring Boolean and multi-stage sequential trigger conditions to detect a specified illegal state transition.	2	24ECE652.2
8	Verify the read/write operation of a synchronous RAM controller on FPGA by configuring bus-level and word-level triggering to capture address and data bus values during a specified transaction.	2	24ECE652.2
9	Control and monitor the operation of a UART transmitter module on FPGA in real time, without re-programming the device, using the Virtual Input/Output core in conjunction with the Integrated Logic Analyzer.	2	24ECE652.3
10	Verify the timing and data integrity of a serial communication protocol (UART/SPI/I2C) implemented on FPGA by capturing the transmitted frame using ChipScope and correlating it with the standard protocol timing diagram.	2	24ECE652.3
11	Identify and analyze clock domain crossing behavior in a dual-clock FIFO design implemented on FPGA by simultaneously capturing signals from two independent clock domains using synchronized Integrated Logic Analyzer cores.	2	24ECE652.4
12	Carry out the complete on-chip verification cycle of a given memory-mapped peripheral/mini digital system with an intentionally introduced design fault — including debug core planning, insertion, hardware triggering, waveform capture, root-cause identification, RTL correction, and re-verification — using ChipScope.	2	24ECE652.4

Exp. No. / Pgm. No.	List of Experiments / Programs										Hours		COs	
Prerequisite Experiments / Programs														
	- Basics of Operating systems. - C programming concepts.										2		NA	
PART-A														
1	(a) Perform the following commands, including their respective options, if available: Date with all available options, cal, calendar, who, whoami, tty, stty, clear,tput, (b) Run the following commands along with their respective options, if applicable- Man, echo, whatis, Uname										2		24ECE653.1	
2	(a) Execute the following commands: bc with a specified scale factor for precision, base conversion using bc (e.g., binary to decimal, decimal to octal, decimal to hexadecimal, etc.), password management, viewing command history, managing aliases, (b) Execute the "ls" command to display comprehensive file attributes with all available options,-view the file's contents, perform file copying and moving operations between locations, and subsequently remove the file										2		24ECE653.1	
3	(a) Execute the following directory-related commands: Create a new directory, navigate between directories, print the current directory path, check disk space usage, compress file content, and archive files. (b) Execute Networking commands-ifconfig, ip command, ping, traceroute, netstat, ss, hostname.										2		24ECE653.1	
4	Establish a student database consisting of 10 records, each containing five fields, and employ the following commands to present the records as per your requirements: head, tail, cut, paste, sort, uniq, tee, nl, and tr, making use of all available options.										2		24ECE653.1	
5	Construct a student/employee database encompassing 5 fields, and employ the grep command along with its full range of options to exhibit										2		24ECE653.2	

	records or patterns using regular expressions		
6	Show both user and system processes, and terminate specific processes by their process IDs.	2	24ECE653.2
PART-B			
7	Create a shell script that prompts the user for a pattern and a filename, then searches for the pattern within the specified file.	2	24ECE653.2
8	Develop a shell script that requests a filename, starting line number, and ending line number from the user. It will then display the lines within that range from the specified file.	2	24ECE653.2
9	Design a login shell script that greets the user with "Good Morning," "Good Afternoon," or "Good Evening" based on the time of login.	2	24ECE653.3
10	(a) Execute the Linux Device Drivers commands – uname, lsmod, modinfo usbcore (b) Explore device files using commands – ls /dev, ls -l /dev. Also, perform USB Device driver Exploration using – lsusb, dmesg and tail.	2	24ECE653.3
11	Write a simple Linux Character device driver and perform driver loading, verification and unloading using – modprobe, lsmod and rmmod.	2	24ECE653.4
12	Interface Linux with Arduino, to read serial data from Arduino using Screen utility.	2	24ECE653.4

TIMING OPTIMIZATION USING CADENCE			
Course Code	24ECE655	Credits	01
L:T:P:S	0:0:1:0	CIE Marks	50
TLP Contact Hours / Sem	30	SEE Marks	50
TW & SL / Sem	-	Total Marks	100
Total Hours /Sem	30	Exam Hours	03
Course outcomes: At the end of the course, the student will be able to:			
24ECE655.1	Apply delay and timing-parameter concepts to correctly determine propagation-delay paths in combinational and sequential digital circuits using Cadence Tempus.		
24ECE655.2	Analyse the effect of coupling capacitance and crosstalk noise on signal timing to identify and mitigate crosstalk-induced delay and glitches in nanometre designs.		
24ECE655.3	Examine clock and timing constraints to correctly classify timing exceptions such as multicycle paths, false paths, and clock grouping in a given design.		
24ECE655.4	Evaluate setup and hold timing violations from STA timing reports and recommend effective design-closure techniques to resolve the identified violations.		
Exp. No.	List of Experiments	Hours	COs
Prerequisite Demonstration			
Demo	Introduction to Cadence Tempus Environment: Tool overview, design flow, input/output files, and GUI walkthrough.	2	NA
PART-A			
1	Introduction to Cadence Tempus Environment: Understand the Tempus tool interface, design flow, input file types, and execute a basic STA run on a sample netlist.	2	24ECE655.1
2	Timing Analysis of Combinational Circuits: Load a combinational circuit netlist and Liberty file into Tempus; identify critical paths and measure propagation delays.	2	24ECE655.1
3	Timing Analysis of Sequential Circuits: Perform STA on a flip-flop-based sequential circuit; measure setup time, hold time, and clock-to-Q delay.	2	24ECE655.1
4	Understanding Liberty (.lib) Files: Parse and interpret a standard-cell Liberty file; correlate cell timing arcs and drive-strength variants with STA results.	2	24ECE655.1
5	Netlist Analysis and Delay Calculation: Analyze a gate-level Verilog netlist in Tempus; compute cell delays and interconnect delays along selected paths.	2	24ECE655.2
6	SPEF/DSPF Parasitic File Analysis: Read and annotate SPEF/DSPF parasitic files onto the design in Tempus; observe the impact of parasitics on path delays.	2	24ECE655.2
PART-B			
7	Back-Annotated Timing Analysis: Perform full back-annotated STA using RC-extracted parasitics; compare pre- and post-layout timing results.	2	24ECE655.2
8	Crosstalk and Noise Analysis: Enable crosstalk analysis in Tempus; identify aggressor/victim nets and evaluate crosstalk-induced delay bumps and glitch violations.	2	24ECE655.2
9	SDC Constraint Creation and Validation: Write and load Synopsys Design Constraints (SDC) for clock definition, input/output delays, and load	2	24ECE655.3
	attributes; verify constraint correctness.		

10	Timing Exceptions – False Path and Multicycle Path: Apply false path and multicycle path constraints in Tempus; verify their effect on slack and timing report paths.	2	24ECE655.3
11	Setup and Hold Violation Analysis: Identify setup and hold violations from Tempus timing reports; analyse the root causes and suggest corrective measures.	2	24ECE655.4
12	Timing Closure and Violation Fixing Techniques: Apply ECO-based fixes, buffer insertion, cell sizing, and path retiming in Tempus to achieve timing closure on a design with violations.	2	24ECE655.4

Data Structures using C: Stack and queues, list, graph, tree, sorting and searching, Hash functions Advanced C programming: Pointers, Recursion, Functions, Structure, Union, C Preprocessor											
MODULE-2			Problem Solving on Object Oriented Programming Using CPP				24SDK66.2			6 Hours	
Object Oriented Programming: Inheritance, Polymorphism, Exception handling, File Handling, Predefined function, Void function, Name spaces, Input and output streams.											
MODULE-3			Problem Solving on JAVA And XML				24SDK66.2			6 Hours	
Object oriented programming using Java: Inheritance, Polymorphism, Abstract class and Interface, Collections, Exception handling, Streams, Functional Interface. XML: DTD, Schema, Server Path, DOM, XSLT, Name Space, AJAX.											
MODULE-4			Problem Solving Using C # And Python				24SDK66.3			6 Hours	
Python: Functions, iterators, Object oriented Programming, Exception Handling, Packages, Frame works- Django, Collections. C#: Object oriented Programming, Delegate, Collections and generic, Name space.											
MODULE-5			Scenario Based Problems On DBMS				24SDK66.4			6 Hours	

ER Model, SQL- DDL, DML, TCL, DCL, Joins, subquery, PL/SQL-Index, Sequence, procedures and functions, normalization, B tree, B+ tree, Forms.

Note:

1. Students shall solve the programming exercises and scenario-based problems available on the designated portal as part of the prescribed boot camp.
2. The CIE assessment and evaluation will be as per the guidelines framed by CDC.

CIE Assessment Pattern (50 Marks – Theory)

RBT Levels		Marks Distribution
		Tests
		50
L1	Remember	5
L2	Understand	10
L3	Apply	20
L4	Analyze	15
L5	Evaluate	-
L6	Create	-

Activity-Based Learning (Suggested Activities in Class)/ Practical Based learning

- Analysis of industry relevant use cases
- Problem solving on scenario-based questions
- Placement portal practice sessions

CAPSTONE PROJECT PHASE-1													
Course Code			24ECE67						Credits			02	
L:T:P:S			0:0:2:0						CIE Marks			50	
TLP Contact Hours / Sem			0						SEE Marks			50	
TW & SL / Sem			0						Total Marks			100	
Total Hours /Sem			0						Exam Hours			03	
Course outcomes:													
At the end of the course, the student will be able to:													
24ECE67.1		Identify societal challenges aligned with the Sustainable Development Goals (SDGs) and classify them within ECE and interdisciplinary domains.											
24ECE67.2		Conduct effective literature reviews using research databases, search strategies, and citation management tools											
24ECE67.3		Analyze existing literature to formulate a clear problem statement.											
24ECE67.4		Formulate an idea and share the idea in a suitable platform.											
24ECE67.5		Organize the article with a structured format, including introduction, background, methodology, analysis, discussion, and conclusion.											
24ECE67.6		Demonstrate effective communication skills through technical presentations.											
Mapping of Course Outcomes to Program Outcomes and Program Specific Outcomes:													
	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	P011	PS01	PS02
24ECE67.1	3	3	2	-	-	3	2	-	3	3	2	-	2
24ECE67.2	3	3	3	2	-	3	2	-	3	3	2	-	2
24ECE67.3	3	3	3	2	3	3	-	2	3	3	2	2	2
24ECE67.4	3	3	3	2	2	-	-	-	3	3	2	2	2
24ECE67.5	3	3	3	2	2	-	2	-	3	3	2	2	2
24ECE67.5	3	-	-	-	2	-	-	-	3	3	2	2	2
Project Phase I: Roadmap, activities, and deliverables													
Goal Selection and Project Planning:													
• Identification of suitable topic based on Sustainable Development Goals. • Forming project teams based on common interests and skill sets. • Teams' involvement in developing project proposals outlining objectives, strategies, and expected out comes.													
Research and Needs Assessment: -													
• Conduct a thorough survey of the chosen SDGs, covering global and local contexts, challenges, and opportunities. • Perform needs assessments to identify specific issues or gaps that student projects can address.													
Interdisciplinary approaches:													
• Integrate interdisciplinary approaches and innovative solutions to address sustainability challenges.													

Knowledge Sharing and Communication:

- Communicate project experiences and insights effectively through presentations, reports, and social media.
- Promote peer learning and collaboration through knowledge sharing and networking platforms.

CIE Assessment Pattern (50 Marks – Activity based) –											
CIE component for every semester						Marks					

Presentation - 1 Selection of topic, PHASE - 1	10
Commencement of activity and its progress - PHASE - 2	10
Case study-based Assessment Individual performance	10
Sector wise study and its consolidation	10
Video based seminar for 10 minutes by each student at the end of semester with Report.	10
Total marks for the course in each semester	50

• Implementation strategies of the project (NSS work).
 • The last report should be signed by NSS Officer, the HOD and principal.
 • At last report should be evaluated by the NSS officer of the institute.
 • Finally, the consolidated marks sheet should be sent to the university and also to be made available at LIC visit.

Suggested Learning Resources:

Reference Books:

10. NSS Course Manual, Published by NSS Cell, VTU Belagavi.
 11. Government of Karnataka, NSS cell, activities reports and its manual.
 12. Government of India, NSS cell, Activities reports and its manual.

Pre-requisites to take this Course:

4. Students should have a service-oriented mindset and social concern.
 5. Students should have dedication to work at any remote place, anytime with available resources and proper time management for the other works.
 6. Students should be ready to sacrifice some of the time and wishes to achieve service-oriented targets on time.

Pedagogy:

• In every semester from 3rd semester to 6th semester, each student should do activities according to the scheme and syllabus.
 • At the end of every semester student performance has to be evaluated by the NSS officer for the assigned activity progress and its completion.
 • At last, in 6th semester consolidated report of all activities from 3rd to 6th semester, compiled report should be submitted as per the instructions.
 • State the need for NSS activities and its present relevance in the society and provide real-life examples.
 • Support and guide the students for self-planned activities.
 • NSS coordinator will also be responsible for assigning homework, grading assignments and quizzes, and documenting students' progress in real activities in the field.
 • Encourage the students for group work to improve their creative and analytical skills.

Plan of Action:

• Student/s in individual or in a group Should select any one activity in the beginning of each semester till end of that respective semester for successful completion as per the instructions of NSS officer with the consent of HOD of the department.
 • At the end of every semester, activity report should be submitted for evaluation.
 • Practice Session Description:

- Lecture session by NSS Officer
- Students Presentation on Topics
- Presentation - 1, Selection of topic, PHASE – 1
- Commencement of activity and its progress - PHASE – 2
- Execution of Activity
- Case study-based Assessment, Individual performance
- Sector/ Team wise study and its consolidation

- Video based seminar for 10 minutes by each student at the end of semester with Report.

Sl No	Topic	Groupsize	Location	Activity execution	Reporting	Evaluation of the Topic
1.	Organic farming, Indian Agriculture (Past, Present and Future) Connectivity for marketing.	May be individual or team	Farmers land/Villages/ roadside / Community area / College campus	Site selection /proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
2.	Waste management- Public, Private and Govt organization, 5 R's.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Site selection /proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
3.	Setting of the information imparting club for women leading to contribution in social and economic issues.	May be individual or team	Women empowerment groups/ Consulting NGOs & Govt Teams / College campus	Group selection/ proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
4.	Water conservation techniques – Role of different stakeholders– Implementation.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	site selection / proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
5.	Preparing an actionable business proposal for enhancing the village income and approach for implementation.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/ proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

6.	Helping local schools to achieve good results and enhance their enrolment in Higher/ technical/ vocational education.	May be individual or team	Local government / private/ aided schools/ Government Schemes officers	School selection/ proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
7.	Developing Sustainable Water management system for rural areas and implementation approaches.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	site selection/ proper consultation/ Continuous monitoring/ Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
8.	Contribution to any national level initiative of Government of India. For eg. Digital India, Skill India, Swachh Bharat, Atmanirbhar Bharath, Make in India, Mudra scheme, Skill development programs etc.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/ proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
9.	Spreading public awareness under rural outreach programs. (minimum 5 programs)	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Group selection/ proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer
10.	Organize National integration and social harmony events / workshops / seminars. (Minimum 02 programs).	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Place selection/ proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

11.	Govt. school Rejuvenation and helping them to achieve good infrastructure.	May be individual or team	Villages/ City Areas / Grama panchayat/ public associations/ Government Schemes officers/ campus	Place selection/ proper consultation/ Continuous monitoring / Information board	Report should be submitted by individual to the concerned evaluation authority	Evaluation as per the rubrics of scheme and syllabus by NSS officer

6	Practical activities / Problem solving exercises
7	Class Presentations
8	Analysis of Industry / Technical / Business Reports
9	Reports on Industrial Visit
10	Industrial / Social / Rural Projects
11	Participation in external seminars / workshops
12	Any other academic activity
13	Online / Offline Quizzes

APPENDIX B

Outcome Based Education

Outcome-based education (OBE) is an educational theory that bases each part of an educational system around goals (outcomes). By the end of the educational experience each student should have achieved the goal. There is no specified style of teaching or assessment in OBE; instead classes, opportunities, and assessments should all help students achieve the specified outcomes.

There are three educational Outcomes as defined by the National Board of Accreditation:

Program Educational Objectives: The Educational objectives of an engineering degree program are the statements that describe the expected achievements of graduate in their career and also in particular what the graduates are expected to perform and achieve during the first few years after graduation. [nbaindia.org]

Program Outcomes: What the student would demonstrate upon graduation. Graduate attributes are separately listed in Appendix C

Course Outcome: The specific outcome/s of each course/subject that is a part of the program curriculum. Each subject/course is expected to have a set of Course Outcomes

Mapping of Outcomes

APPENDIX C

The Graduate Attributes of NBA

Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization to develop solutions to complex engineering problems.

Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development.

Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems, components or processes to meet identified needs with consideration for public health and safety, whole-life cost, net zero carbon, culture, society and environment.

Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis and interpretation of data to provide valid conclusions.

Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering and IT tools, including prediction and modelling, recognizing their limitations to solve complex engineering problems.

The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for their impact on sustainability with reference to economy, health, safety, legal framework, culture and environment.

Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national and international laws.

Individual and Collaborative Team Work: Function effectively as an individual, and as a member or leader in diverse and multidisciplinary teams.

Communication: Communicate effectively and inclusively within the engineering community and society at large, including effective reports, design documentation and presentations, considering cultural, language and learning differences.

Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

Life-Long Learning: Recognize the need for, and have the preparation and ability for independent and life-long learning, adaptability to new and emerging technologies, and critical thinking in the broadest context of technological change.

APPENDIX D

BLOOM'S TAXONOMY

Bloom's taxonomy is a classification system used to define and distinguish different levels of human cognition—i.e., thinking, learning, and understanding. Educators have typically used Bloom's taxonomy to inform or guide the development of assessments (tests and other evaluations of student learning), curriculum (units, lessons, projects, and other learning activities), and instructional methods such as questioning strategies.
